BOSTON, THURSDAY, JANUARY 7, 1926-VOL. XVIII. NO. 35

PACT INCREASES POWER IN HANDS OF ARAB LEADER

System of Settling Frontier Troubles Agreed Upon by Contestants

SPECIAL TRIBUNAL TO SCAN AGGRESSION

Decisions Final, and Chief of the Tribe at Fault Will Be Held Responsible

By Cable from Monitor Bureau LONDON, Jan. 7-The official texts are today published here of the agreements concluded on the one hand between Ibn Saud of Nejdleader of the Puritan Wahabi Muhammadans, who have recently overrun all central and eastern Arabia-

and on the other, the governments set up by Britain in Transjordania and Irak, respectively.

The importance of these agreements, whereof the chief feature, already published in The Christian Science Monitor, is that they provide in a hitherto lawless, much-fought-over region of Asia a system for the set tlement of frontier disputes not al together dissimilar to that of the in-ternational joint commission which has so long kept peace upon the borders of the United States and

The agreements create a special tribunal to meet periodically to investigate any aggressions committed across the frontiers, to assess the damages and losses, and to fix the responsibility. Each Government is to have an equal number of representatives on the tribunal who will elect an independent president.

The tribunal's decisions will be

final and be well carried out by the Government concerned upon those found guilty in accordance with tribal custom. The agreements also provide that the punishments shall be severe and that the chief of the tribe committing the aggression shall be held responsible.

Need Seen for Co-operative Market to Place Farmer in Economic Gear

By the Associated Press

Lincoln, Neb., Jan. 7 STABLISHMENT of a Federal Farm Board and the organization of producers into representative co-operative bodies to be in-corporated for the purpose of caring for the agricultural sur-plus, was suggested by Frank O. Lowden, former Governor of Illinois, before representatives of a dozen farm organizations here.

Mr. Lowden avowed that agriculture was "badly out of gear with

other parts of our industrial structure," and that organization was the farmer's means to gain his place.

"Economists are practically agreed," he said, "that agriculture is in a serious plight because of the disparity between prices of commodities the farmer sells and those he buys. Because the farmer must sell in an unorganized manner on an organized market, this disparity exists. The remedy is co-operative marketing.
"Suppose we had a Federal Farm Board. Suppose that board

found that producers of a farm commodity were sufficiently organ-ized so as to be representative of all producers of that commodity. Suppose that when it ascertained this fact it should authorize such producers to form a corporation for taking care of the surplus, either storing it to meet a possible future domestic need or exporting it upon the best terms available, the expenses and losses incurred for storage or in export to be borne proportionately by all producers of

PROTECT CITY

United Improvement Association and Dorchester Board of Trade Present Measures

To enable the Finance Commission to exert a more powerful influence in better protecting the City of Boston from hasty and ill-advised expenditures and to expedite redress in the courts when necessary, two separate bills were introduced in the Legislature today to irvest the commission with authority to institute legal proceedings on the basis of its investigations.

Designed to aid further in guarding the city's finances, the bill presented by Thomas H. Bilodeau, Representative from Boston, at the request of Raymond P. Delano of the provides that the Finance Commission shall have specific power to seek the removal, through the courts, of city officials guilty of misconduct in administering the municipal

May Take Legal Action The second bill, which Mr. Bilo-

deau introduced in behalf of the Dorchester Board of Trade, stipulates that the Finance Commission shall have authority to take legal action to restrain the illegal raising or spending of money or the incurring of illegal obligations by city officials or their agents.

Addition of this privilege to the facilities of the commission that its scrutiny and correction of possible city financial errors may pedited, is viewed as a significant step toward placing the city's finances upon a sound and guarded

With the full co-operation of Mayor Nichols assured, the Finance Commission is already proceeding to take a more intimate part in aiding the new administration in its fiscal problems. Its position is rendered especially advantageous in the fact that it is an impartial, non-Proff J. B. Lindsey of the Massa-chusetts Experiment Station at Amhas now taken the form of a of the municipal budget and the city pay roll in an effort to aid the Mayor to obtain minimum expenses, and to vegetable and flower growers to use better methods, was another. Both are veterans in agricultural service whom the State Department of Avice Culture to be a service when the state Department of Avice Culture to service when the state Department of Avice Culture to be a servi

ment Association's bill is as follows:

An act to authorize the Finance
Commission in the city of Boston to
institute legal proceedings where it deems necessary or expedient, on

behalf of the city

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same. of the General Laws is hereby amended by adding at the end thereof another paragraph, to read as follows: Whenever the Finance Commission of the city of Boston shall deem it necessary or expedient or in the interests of the city, to initiate legal proceedings in the courts of this Commonwealth, for and on behalf of the city of Boston, it may do so, and if it shall have cause to believe that any official, his office or employment, or has been guilty of improper conduct of his office or employement, or has wrongfully caused a loss to the city of Boston, then it may initiate such legal action as may be necessary to cause the city to be reimbursed, and for the removal of such official, officer o remployee, os that said section will read as follows:

Section 53. If a town or any of its officers or agents are about to rais officers or agents are about to rais

officers or agents are about to rais officers or agents are about to raisor expend money or incur obligations purporting to bind said town
for any purpose or object or in any
manner other than that for and in
which such town has the legal and
constitutional right and power toraise or expend money or incuobligations, the supreme judicial or
superior court may, upon the petition of not less than 10 taxable inhabitants of the town, determine
the same in equity, and may, before the same in equity, and may, before

the final determination of the cause, restrain the unlawful exercise or abuse of such corporate power.

Whenever the finance commission in the city of Boston shall deem it necessary or expedient or in the in-terests of the city, to initiate legal proceedings in the courts of this Commonwealth, for and on behalf of the city of Boston, it may do so, and if it shall have cause to believe that any official, officer or employee of the city has been guilty of improper city has been guilty of improper conduct of his office or employment, or has wrongfully caused a loss to the city of Boston, then it may initiate such legal action as may be necessary to cause the city to be reimbursed, and for the removal of such official, officer or employee Commission Lacks Authority

the legislative committee of the said today that he history of the Finance Commission has shown that, while it has done important work for the city and the taxpayer, it lacks sufficient power to make effective its recommendations.

"This bill would give the commission authority to go to court and

Ready in Few Weeks The Boston Finance Commission is studying the budget Mr. Nichols hopes to hand to the City Council for its consideration within a few weeks. Until Mayor Curley's second inauturation in 1922, the commission guration in 1922, the commission had, year after year, since 1909, conducted a study of the budget re-quirements for Boston and submitted its findings to the Mayor and the City Council. Michael H. Sullivan, recent chairman of the commission ceased to conduct this work when Mayor Curley indicated that he did not seek the advice of the commis-

sion on proposed appropriations. In discussing the work of his ways and means committee, Mr. Nichols said he did not intend to ask it to with its thousands of items. Charles Fox, the Budget Commi has been preparing a trial budget for the Mayor and they will soon resume their budget conferences and prepare the formal bill of appropria-

The Mayor admits that the subject of salaries is giving him much thought. He has directed Mr. Fox. to include provision for the raising of the wages of the city laborers from \$4.50 a day to \$5, and for the employment of 300 new policemen for traffic duty. The Mayor said that he laborers must have not less than \$5 as a living wage.

Wants Money's Worth

"There are many other inequalities in compensation," said the Mayor, "but first of all I want to get a dollar's worth of work for a dollar. When that is done, I believe the work for the city will have made great strides forward. Compensa-tions must be adjusted, but the taxpayers are entitled to dollar for dolfear too little thought has been given to this phase of our municipal prob-

BIG PAY PROVES SMUGGLING LURE

Aliens Eager to Enter the United States by Any Means

wages and the prospect of continu-bus employment in the United States are the lure causing many persons of foreign birth now in Canada to make forts to enter this country, either legally or illegally. Reports that substantial sums of money are being offered by foreigners to any one who will assure them of an entry into the United States are said by immigration inspectors along the border to be well founded.

Most of those who have made offers are reported to be former residents tween the two countries. of southern or central Europe. In bygone years many Chinese were illegally transported across the Niagara frontier, but this practice has been largely broken up through vigilance of the immigration authorities and the relative ease with which newly-arrived Chinese can be de-

Easy to Remain

Once in this country, and especially in cities such as Buffalo, with arge foreign colonies, it is easy

ing, customs inspectors said.

Various methods are used by those increased vigilance which inspectors are exercising at all bridges and ferries along the frontier, and the vig-orous enforcement of the quota laws, is resulting in many would-be immigrants being forced to return to Canada, either to await such time as the quota of their respective nations will permit them to enter legally, or else to make an effort to make illegal

In former years the best-known route was across the Niagara River under cover of darkness. For sums ranging from \$10 to \$50, squatters along the Niagara could be obtained to transport these illegal entrants. The passage is a relatively easy one to make, the width of the river being less than a mile and there being much unsettled country along its borders between this city and

Tight Border Patrol

But with the advent of prohibition, border patrols were established to prevent night rumrunning, and these Federal Government agents have made it dangerous for the former operators of row boats and power boats to endeavor to transport immigrants across the river. The result is, this practice has been largely reduced, if not broken up as an organized business.

Several persons have crawled along on the girders beneath the bridges at Niagara Falls, hoping to make the passage undetected. Some oubtless have succeeded, but several have been apprehended.

One man was detected recently hidden beneath the seat of an automobile. Others have been detected trying to conceal themselves in and aboard freight trains. So vigilant has been the policy of the

Reduction of \$500,000,000 and Repeal of Levy on Automobiles Talked

Special from Monitor Bureau WASHINGTON, Jan. 7 - Democing it manifest that they are preparing determined opposition to the tax bill now being considered by the Senate Finance Committee. At the same time it is has been made clear that Republican members on the committee are willing to follow the Administration in support of the measure as it came from the House, where it was passed shortly before the Christmas holiday recess.

Furnifold M. Simmons (D.), Senator from North Carolina, ranking and an authority on tax matters, in an interview stated that the Democrats were engaged in formulating a new tax bill. "We shall be fair in the matter,"

Mr. Simmons said. "We will put our demands before the Republicans on the committee. If they compromise and agreements can be made, we will work out our ideas that way. But if they don't we expect to send in our own tax bill.

Mr. Simmons' Views

"I don't care to say at this time just what our proposals will be. I will say, however, that any measure we stand for will provide a very considerable additional decrease in taxes compared to what the Administration bill proposes.'

Asked if he thought the Administration would be willing to compromise on the Democratic demands he admitted that he did not expect that. Mr. Simmons indicated that the bill the Democrats expect to offer The result is a house which is contractor, and cost. Mr. Lavasseur will carry a tax reduction of approx-20x24 feet, with a 7-foot porch across estimates, about \$1250. They have imately \$500,000.000. The bill being considered provides for a reduction of \$325,000,000. He also intimated that his measure would do away with according to the point of view. From the viewpoint of the child's need, as Mr. Levasseur knows, it is by no leaves with plenty of out-of-doors ferent schedule of income tax rates ferent schedule of income tax rates Attitude of Republicans -

FOREST DIVISION PLAN PROTESTED

Speakers at Richmond Congress Sound Warning on Grazing Privileges

RICHMOND, Va., Jan. 7 (Special)
-George D. Pratt of New York, president of the American Forestry Association, at the joint convention of that organization and the Southern Forestry Congress voiced the protest of the foresters against alleged efforts of "certain powerful stockmen to ruin their national forests of the

vest."
"If the stockmen are successful in their legislative siege in Washington small group of individuals grazing privileges that would make forestry and water protection in these public iorests a joke and a sham."

The present annual drain on the forests of the country is four times as great as the growth, J. C. Williams, of the Southern Railway system, told the foresters. Unless there is a change this country will be treeless about 1964, he warned. However, he admitted that because of the present awakening of the people and the high cost of wood products, consumption will be cut down and regulated and reforestation should be possible.

Gov. E. Lee Trinkle of Virginia, in his address of welcome, stated that his message to the coming Virginia General Assembly would emphasize forestry more than ever before and that the budget asks for 50 per cent more than formerly for the forestry

Newly-elected directors of the American Forestry Association are: officials of the association in confirm-ing the purchase of the adjoining Carnegie Institution, Washington; The site is in the center of the thority on wild life, Washington; New York, and F. Glories of the clipper ships that most New England institutions sailed the seven seas and brought founded for profit. It has diversified the romances of Araby Carthage, what might have been a prosaic, if the romances of Araby, Carthage, and Cathay to New England, carving growth and trade expansion with a its way out of a wildreness, were recalled by the special program at the Jordan Marsh Company's diamond jubilee today.

Not only from Boston but from Salem, famous harbor of famous ships, from Marblehead and all about, folk came trooping to the reof the Donovan Motor Car Company, juvenation for an hour of those wonders of the sea. As much as anything else, perhaps, they gave poetry, color, lasting story and prosperity

more, a founder of Gilmore's Band, sat closeted with Eben Jordan, to New England. ame an inevitable regret that their picturesqueness, if nothing more, was banished from the sea.

Gathered in the large hall were models and prints of clipper ships. old ship charters, clearance papers and manifests, some of them signed and loaned by the Marblehead Historical Society. Ship models were loaned for the occasion by Arthur Schofield of Marblehead and Allan Forbes of Boston.

Model of "Old Ironsides' Of chief interest was a model of "Old Ironsides," loaned by the United States Government and valued at \$11,000. Lieut. J. A. Lord of the United States Navy, appointed by the United States Government to restore that ship to its original condition was a speaker of the day, telling something of the history that has made it the best loved and most notable of all ships that ever flew the United States flag. The Rev. Dr. Charles E. Park, pastor of the First Church in Boston (Congregational-Unitarian), gave an historical address on clipper ships, illustrating it with lantern slides. Parker H. Kemble of Marblehead gave a talk on exchange or any express or trans-

ships and shipping of olden times. While the assembly hall was packed during the afternoon program thousands of men and women visited the store during the day, examining the exhibits that were to be found throughout the building and admiring the decorations. It was almost with wonder that they came to realize that for three-quarters of a century this house has served the public, clothed people, shod them, furnished their lighted their evenings, their bookshelves, entertained their leisure with radios and talking machines, equipped them for sport, for travel, for work, for play, and provided continual thrills for

Plans for Movement to Aid Home Industries

MAINE PRODUCTS

AUGUSTA, Me., Jan. 7 (Special)-Newspapers throughout Maine will start a campaign on Jan. 11 and 18 ucts, according to an announcement by Gov. Ralph O. Brewster to all means made up of dollar signs, but civic organizations in the State. He

The idea behind this movement is to encourage greater utilization of Maine products by Maine people. The result of this movement will be: First, to keep Maine income circu-lating more in Maine; second, an increased demand for Maine products: and, third, increased activity for the productive labor of Maine.

Coincident with this publicity by

the newspapers, the Grange, local Chambers of Commerce and other organizations will distribute to householders throughout the State a directory of Maine products, showtained in the various localities. Posters urging the buying of Maine products will also be distributed through the same media and at the same time.

In order that real stimulus may be given to this movement, it is hoped that the presidents of the various service clubs and women's clubs, and any other civic organiza tions in each community, will form themselves into a committee to ar-range a joint meeting of their clubs to be held some time between Jan. 11 and Jan. 31.

At these meetings the purpose of this campaign will be explained by a speaker to be furnished either by the joint community committee by the speakers' committee of the State of Maine Associates. The committee of the State of

Maine Associates in charge of the have no trouble in getting them. This with Governor Brewster in his in- ment-operated shipping lines. Too vitation to the civic organizations many people must know the inside o participate in the renewed activity workings of the Government organiconnection with this movement. Clarence C. Stetson of Bangor, Maine Publicity Bureau, is chairman of the committee, and the other memers are: William S. Linnell, Portland: Charles J. Ault. Auburn: Guy P. Gannett, Portland, and Albert J. Stearns, Norway.

FACTS SOUGHT ON ALUMINUM

of Alleged Illegal Monopoly

Special from Monitor Bureau WASHINGTON, Jan. 6-A thorough Congressional sifting of the American Aluminum situation is promised. Resolutions introduced in House and estigation of charges of monopoly any of America with which Andrew W. Mellon, Secretary of the Treasury, and his brother, R. B. Mellon, rendered in the past, and the inconclusive manner in which previous in vestigations have been handled are said to convince impartial observers that it is for the best interests of

Thomas J. Walsh (D.), Senator from Montana, who handled the Teapot Dome investigation, introduced resolutions in the Senate, while William A. Oldfield (D.), from Arkansas, sponsored a resolution in the House, which would give it wide aucases directly and indirectly attribthority in investigating the charge utable to alcohol in its various that an aluminum monopoly has been forms " says Dr. Forrest G. Tyson. built up by tariff favoritism.

all parties that the controversy come

Reviews History of Case Mr. Walsh's resolutions deal directly with the Aluminum Company of America, and his speech reviewed the past history of the case. As far back as 1912, he said, a decree was issued in a Pennsylvania district court restraining the company from certain practices termed monopolistic. In 1922 the Senat directed the Federal Trade Commission to inquire into the aluminum situation, and that had violated the 1912 decree of the court. On Oct. 10, 1924, mission's findings were reported to the Attorney-General for a legal opinion, and on Jan. 30, 1925, the latter declared his judgment that the company was in contempt, having

This far, according to Mr. Walsh the matter was simple, but at this point the Attorney-General explained that inasmuch as the inquiry extended only up to 1922, and since a one-year's statute of limitations had sanity intervered, it would be necessary to bring investigations up to date to nopolistic practices had been carried on subsequent to 1922.

Commissioner Reversed Opinion Furthermore, the Federal Trade ission, which in October, 1924, submitted its charges to the Attorney-General, advised him at that time that the voluminous evidence which they had collected against the company would be at his disposal. Later, however, following changes in the commission's personnel, the body reversed itself, and ruled that the Attorney-General's agents should not have access to the evidence. Mr Walsh charges that the Attorney General's investigation is now being evidence" that came from the files of the Aluminum Company itself in the commission's possession

The man most affected by the present controversy, Mr. Mellon, would, it is said, like nothing better than a clearing of the air. A unique point in the situation is the operation of the one-year statute of limitations. It is hardly possible to mobilize a cumbersome inquiry like this in a single year, it is said, and vet even if evidence of guilt is adin the past, the company is automatically freed from legal retalia-

Limitation Expires Soon cause for Senator Walsh's sudden action. Information from the Attorney-General's office last week showed that the new aluminum report would be issued round January 21. This makes the present inquiry virtually a race against time, for the one year statute of limitations comes

into play again on Jan. 30.
"Of course," said Mr. Walsh, "if it takes more than a year to ascertain whether these great corporations have been guilty we will have to extend the statute of limitations or wipe it off the statute books."

Mr. Walsh's first resolution would cause the Senate Judiciary Committee to investigate and decide whether the Attorney-General's office has acted with due vigilance. 'His second resolution would require the Attorney-General to give an opinion on the legality of the refusal of the Federal Trade Commission to give him access to the evidence

BRITISH COLUMBIA ASKS

FREIGHT REDUCTIONS

7ICTORIA, B. C., Dec. 29 (Special Correspondence)-When the Canadian Railway Commission commences to rebuild Canada's entire freight rate structure from the foundation wp early next year, western provinces wil make a supreme effort to secure sweeping reductions in present transportation costs. British Columbia is leading this move with a demand for a general scaling down of present rates and for a further rerestern rates and for a further reduction in the cost of shipping grain from the prairies to Pacific coast ports.

The reductions in grain rates made

by the railways some time ago are not sufficient to implement the orders Congress to Sift Charges of the railway board completely, according to John Oliver, British Columbia Premier, who is preparing now to make vigorous representa-tions on the subject to the board shortly. Express rates also will be under review when the board commences its, general revision, the Premier has been informed. This revision was ordered by the Federal Government some time ago, following years of agitation on the part of western provinces against the high rates charged within their boundaries as compared with those in effect in eastern provinces.

INSANITY DECREASED BY DRY ACT, ASSERTS HEAD OF . HOSPITAL

Maine State Institution Figures Said to Refute Statements Being Made

AUGUSTA, Me., Jan. 7 (Special)-'The Volstead Act and its enforcement has undoubtedly had the effect forms," says Dr. Forrest G. Tyson, superintendent of the Maine Insane Hospital.

"The man on the street will tell you that insanity, due to increased you that insanity, due to increased drinking of low-grade liquors and the increasing use of drugs which supposed to have followed the shutting off of the liquor supply, has greatly increased. Such is not the and we have the figures on

the dry ones ensuing. "As a matter of fact, only a very thing than that. small percentage of insanity cases small percentage of insanity cases are directly traceable to alcohol in its various forms. . . On the other hand, alcohol may be a contributing

stonishing vitality: it is the hour when the floodgates are opened. The freedom to be Czech, to write Czech and to preach Czech is realized. It is egrettable that the language is so foreign to western Europeans.

There is a novel, for instance, "Dolina" (The Valley), by Jan Vrba, which is a story of life among the Chods. Like Knut Hamsen's tales of the soil, it deals with the rough peas-ant life of this tribe of Czechs who dwell in the extreme west of Bo-hemia. Then there is "Juvenilia," a look of critical essays by F. X. halda, a professor of western literature at the Caroline University, and "creator of Czech literary criticism."

And the noems of Rudolf Medek alled "Laska a Smrt," in which this Czech legionary returned from Siberia, draws nearer to God. Miroslav Rutte, in his "Skryta Tvar" (the Hidden Face), "has placed himself on the side of Romain Rolland in his conflict with Barbusse." Pan Rutte, we are informed, has shown in thes essays "the entire complex of Czech literatude since 1918." What a treasure chest this new Czech literary movement must be for those for tunate ones who possess their lan gaage key-or may borrow it!

JURY CRITICISM STIRS COMMENT

One Philadelphia Judge the struggle was. Blames Not System, but the Service

PHILADELPHIA, Pa., Jan. 7 (Special)—Criticism of the jury system that has followed certain findings in this city during the last year is attracting much attention here. Judges during the last six, months have criticized certain juries, both grand and trial, for their apparent lack of interest in liquor prosecutions, one of these being made the subject of an ttack from the bench because of its ndiffer nce.

More recently the acquittal of two lection boards on charges of primary frauds, and failure to agree in a third case, has evoked further objection to the system of selecting jurymen in this city. A movement is now under way to improve .conditions, but those inteersted in it are finding the trouble

not so much with the standard of the jury system itself, as with jury In this connection Harry S. Mc-Devitt, of Common Pleas Court No. 1, one of the progressive jurists of the city judiciery, takes the view that objectionable jury decisions are the

result in large part of the methods employed by intelligent citizens to escape service. "If there is to be criticism of juries," 'e said, "the criticism should be directed against those who seek

to escape scrvice, rather than against those who erve and do their best." Judge McDevitt contends there is nothing v. g with the machinery for providing and furnishing jurors, but that the real trable rests with those who but private, selfish interof Slavonic Tourist Clubs. This adds ests before their public duy. By in ference he blames the judiciary for accepting these excuses and says, "In recent political speeches during the my experience with that branch of difficult , get good jurors if one does not listen to every plea for excuse." the near future to seek relations Lavesti ation of the number of existing between Czechoslovakia and France." This can mean only one thing: a defensive alliance. It is the

purpose of Czechoslovakia to be the bridgehead of Slavism in Europe, and the sturdy republic seems well launched on the way to accomplish-CURRENCY INQUIRIES By Special Cable

Special Correspondence ENTURIES ago in Oxford when

the Sunny Hours"

there was no great university and even no college buildings students met in rented halls in the cobbled lanes back of St. Mary the Virgin's Church. Here they sat huddled in the straw on the floor for warmth, listening to the wisdom of the masters. There were no books then, only the manuscripts of scholars who struggled to keep the lamp of learning alight in the darkness of

It was a bitter struggle to get an education in those days, and a story which is traditional in Oxford to this day illustrates just how bitter There were three students eager

for learning, who lodged together in a mean dwelling and battled bravely against poverty. It was a rule then, as it is now, that the students at-tending lectures should wear a gown, called capa in those times. So poor were these students that even after pooling their wealth they were able to buy only one gown. So while two stayed in their lodgings and ate their bread and cheese, the third went to the halls of learning, and on his return related what he had heard and turn about until better days came to them.

Today in Oxford no student goes hungry or without a gown, and in the halls and lecture rooms, rich with their ornaments and portraits the poor students of the middle ages girl have been attending a series of lectures in the halls of the examination schools. Each morning they come, led by a chum through the streets and up the maze of marble stairs and are carefully seated well up front. At the end of the lecture, some fellow-student always comes to lead them back to lodgings.

To see a tall blind boy being led

by a slender girl in cap and gown makes one realize that the road to learning to some requires the same courage today it did for the poverty-

stricken clerks of School Lane more than 500 years ago.

AUSTRIANS QUIT WORKLESS LAND

Steady Stream of Emigrants Seeking South America, France, and Russia

VIENNA, Dec. 20 (Special Correspondence)—The pressure of more than 100,000 unemployed in Austria is squeezing out of the country a steady line of emigrants. They are going almost entirely to Brazil, France, Germany and Russia. Brazil has an agent in Vienna whose sole purpose it is to see that as many as possible qualified agriculturists and industrialists, plus their families, are started on their way to South Amer-ica. Passage free is offered as one of the advantages. The Austrians are going principally to the Province of Sao Paulo, where the majority of the inhabitants are of German origin. Twelve hundred Austrians have gone out to Brazil to date.

As regards Russia, a party of 250 industrial workers has just been as-sembled and is to leave shortly for that land. Thirty per cent of the applicants were turned down. The Soviets offer a reduction on their rail-ways of 25 to 50 per cent of the fares. Other groups are expected to be prepared to go to Russia should this first draft find favor with the Soviet employers.

There are in France at present some 2500 Austrian workmen, and the number is increasing at the rate of 50 a week. The raising of the visé requirement for Austrians proceeding to Germany has also tended to crease the quota of Austrian immigrants. Finally, it has been suggested in Vienna newspapers that Austrians are also going over in considerable numbers to the Succession States.

The cross-word puzzle rage has only barely touched this city by the Danube. Perhaps it blew over because it was too simple a thing to bother with for these people who lay the foundation of their educations with Latin and Greek and a brace of modern languages. Occasionally, however, the lighter mood prevails, as when, but recently, the Reichspost drew attention to a "fifteenth century word puzzle which had just been

In Kesermarkt hung a tablet, with the inscription upon it: "XIPKMV CENTCV 1 WEHI OMTAN." And for five hundred years no one was able to decipher it; perhaps, after all, the cross-word craze from across the water has given investigation the necessary spur forward. It would complicated manner by which the riddle is unraveled. It means, however, that a certain Herr Pacher erected the tablet in honor of Saint Wolfgang, Saint Christopher and Saint Vitus; but, for political reasons, Herr Pacher wished to keep it a secret that he was responsible for the tablet and the inscription.

Who will buy my palace? Ah, if only an auction might be held in America, summoned by an Austrian town crier with a sonorous voice! And if only to this auction might come those wealthy Americans yearning for palaces! What a business could be done! For there are palaces of archdukes and counts and princes and barons in Vienna for sale at less than the cost of rental for a summer cottage at Newport News. A Vienna newspaper has just published a list of these palaces—buildings which ornament the city much as Gobelin tapestries grace a museum A house which cost its tit

at first, making everything comfortable for the winter, and putting seeds into the ground, as nature does, so they'd be ready to come up as soon as spring came, and the children were left pretty much to their own devices. They had already decided, however, that the thing they wanted most of all was a bird bath in the garden. In the books that father and mother had been looking over for many months before they moved, all the lovely gardens had bird baths among the flowers and shrubs. That was the first thing they had looked for in the new garden, but they didn't find it.

"I don't want to wait till spring for a bird bath, do you, George?" said Grace to her brother one day when they were poking around in the garden!

"No." said George, "I want it ready when the very first bird comes back. If they don't find a bird bath when they come they might go somewhere else to live."

"Let's see whether we can't make one ourselves!" said Grace. "There are things around we can use." So they set to work.

They found an old stump lying just outside the back door. It wasn't very large around, but it was cut of evenly at both ends. With a good deal of labor they rolled it over to the hedge and set it up between two tall bushes. Then they found a fist earthenware dish in the cellar, which they put on top. It was brown like the stump and looked yery well. into the ground, as nature does, so they'd be ready to come up as soon as spring came, and the children were

OVERCOATS

DENNENEY MOST VALUABLE SO FAR

Leading Goal Scorer, Has Most Assists and Only One Penalty Recorded

MONTREAL, Que., Jan. ? (Special)
—Apparently the official scorers
around the National Hockey League
are keeping up to date more this season than in past years, as president
Frank Calder of the professional circult was able yesterday to announce
the official statistics for the first thir I
of the season which only ended Tuesday night.

day night.

According to the figures Cyril Dennency of the league-leading Ottawa Senators, has been the most valuable player so far as he not only leads the goal getters with 12, but has given more assists, seven, than any other player in the league. In addition Dennency has served but two minutes with the penalty timers during the season.

Selbert of Montreal and Aurel Joliat are tied with Morenz with 12 points but they have been helped by their assists. Selbert and Corbeau of St. Patricks have been of the most assistance to their teammates after Denneney, each having made five passes for goals.

neney, each having made nive passes for goals.

The aggressive Montreal Maroons are the most penalized team in the league to date, having received 104 minor penalties and four majors, a total of 228 minutes or 3h. 48m. Canadiens are the next offenders with 66 minors and three majors for a total of 2h. 27m. The total time served in penalties y the other clubs are: New York 2h. 19m.; Ottawa 2h. 10m; St. Patricks and Pittsburgh 1h. 56m. each, and Boston 1h. 23m. Herbert J. Drury of Pittsburgh is the only player who has been given a match foul. William Boucher of Canadiens has been out of the last two games played by his club through an indefinite suspension by President Calder. Broadbent of Montreal and Conacher of Pittsburgh are the only players who Pitisburgh are the only players who are on the verge of suspension. Both of them have two major penalties and a third means automatic suspension.

a third means automatic suspension. The statistics show one reason why it the Montreal Maroons suggested a change in the penalty rules regarding suspension for three majors. Broadbent its one of the two who have already secured two majors and their forward line has incurred 64 minors and four majors, Broadbent having 22 and 2, Stewart 21 and 1 and Seibert 21 minors. In the matter of scoring, six players have scored three goals in one game, Dye and Adams of St. Patricks, Joliat and Morenz of Canadiens. Herberts of

Seventeen Colleges in Hockey League

Middle West Expects to Have Strong Organization in the Ice Sport

MINNEAPOLIS, Jan. 7 (Special)—Seventeen western colleges and universities have joined the Northern Intercollegiate Hockey Association which this week began the work of developing a better brand of amateur hookey through standardization of rules, selection of committees and officials and a general campaign to enficials and a general campaign to ensist the scope of the organization so as to take in many more institutions before the opening of the first playing season a year from now.

The new league which aims to put college hockey on a par with the best amateur efforts in the country and which seeks representation in United States Olympic tryeuts had its organization meeting in this city at the call of Emil Iverson, coach of the University of Minnesota hockey team. He has been named secretary and treasurer.

The colleges which have entered to

COMPSTON TO STAY IN U. S. ST. AUGUSTINE. Fia., Jan. 7—Archibald Compston, the greatest golfer Europe has produced in years, has do cided to remain in the United States as a playing professional at a club in the east. The British champion tentatively greened terms for a summer residen

SPENCE IN RECORD SWIM JERSEY CITY, N. J., Jan. 7 (A)—In an unpaced time trial held under A. A. U. rules, Walter Spence of the Brooklyn Central Y. M. C. A. established last night a record of \$11/4s. for the 50-yard breast stroke in the 75-foot pool of the Jersey City Y. M. C. A. There was no previous record for this distance over the long course. The National A. U. record for the short course for the distance is \$1/4s.

CRESCENTS DEFEAT QUEEN'S NEW YORK, Jan. 7—The Crescent Athletic Club defeated the Queen's University basketball team in the formar's gymnazium last night by 41 to 22. It was the tenth straight victory for the Half Moon. The victors showed a fifte passing game and splendid teamwork, running up 13 baskets from the floor. Sutton, right forward for the Canadians, was the high scorer with five goals from the floor, mostly long shots.

LAFAYETTE ELECTS COOLEY EASTON, Pa., Jan. 7—Thane S. Cooley '27, Oak Park; Ill., was last night elected captain of next year's Lafayette College soccer team. Cooley has played at inside right or center forward for the last three years.

NEW GOLF BALL NOT REJECTED

English Officials, However, Do Not Approve Use in 1926 Title Events

NEW YORK, Jan. 7 (P)—Denying that a larger and lighter golf ball recommended by the United States Golf Association has been rejected by English officials, W. Norman Boase, chairman of the championship committee of the Royal and Ancient Griff Club of St. Andrews, yesterday asserted that there was "no difference of opinion" on the subject between the ruling links organizations of the United States and England.

Mr. Boase, in the United States on a business trip, declared, however, that the Royal and Ancient Club had not approved the proposal that the new ball be played exclusively in 1926 championship events in both countries. It was deemed unfair, he said, to use the championship tournaments for experimental purposes.

call of Emil Iverson, coach of the University of Minnesota hockey team. The has been named secretary and treasurer.

The colleges which have entered to date are University of Minnesota, University of Wisconsin, University of Minchigan, University of North Dakota University of North Dakota Agricultural College, Michigan College of Mines, North Dakota Agricultural College, Marquette Vormal School, Mines, North Dakota Agricultural College, Machaster College, Ex. John's College, St. Olaf College, St. John's College, Machaster College and the Seveleth and Hibbing junior colleges.

With the construction of hockey risks in other large colleges such as University of Chicago, Northwester and University and the University of Illinois, these and others are expected to join the association before next season. The game is witnessing a tremedous growth in popularity in this section and many small colleges are adding the sport to their curriculum; In order to take care of the increase in growth of the league, as well as the disparity in sizes of the colleges repreduced the sport for the first six or seven hand above. Lanadian Soc. 9

HIBBING, Minn., Jan. 7 (Special)

The St. Paul hockey team defeated the Eveleth-Hibbing Club, 3 to 1, in the second game of the two-game series played here last night. The Rangers were far from their best and many opportunities to score were lost. First scoring came in the second period when Emmett Garrett caught the puck in center loe and with clever maneuvers evaded several of the Ranger players and took a close shot at the net registering the first score.

This goal spurred the Rangers to action and after several minutes of playing Percy Galbraith succeeded in sending the puck to the back boards with a fast shot which was caught by Victor Desjardien on the rebound. Desjardien made a shot at goalie Miller and when the puck rebounded from his pads Galbraith shot the tieing goal for the Rangers.

St. Paul scored again just a minute become the second period was over HIBBING, Minn., Jan. 7 (Special)

for the Rangers.

St. Paul scored again just a minute before the second period was over when E. Garrett carried the puck alone to the net and had a clear shot at Byrne. Many fans thought Garrett had kicked the puck, but Referee Keane did not see it and the goal was allowed.

In the third period the Rangers had two wide open shots at Miller, but the

passing to Conroy who scored. An en-counter between Ade Johnson and Frank Goheen caused both to be ban-ished for the remainder of the game. Rodden, Clarke, and Hill played best for the Rangers, and A. Conroy, E. Garrett and Goheen starred for the visitors. The summary:

SYRACUSE DEFEATS CORNELL SYRACUSE DEFBATS CORNELL ITHACA, N. Y., Jan. 7—For the first time since Cornell and Syracuse Universities started playing basketball in 1820, the Orange triumphed over the Red and White last night by a score of 34 to 21. Thus Syracuse maintained the fast pace it has set since the beginning of the season, and added another member of the Intercollegistie Basketball League to its list of victims. The Grange has already defeated Princeton University and University of Pennsylvania.

JACOB SCHAEFER REGAINS WORLD'S BILLIARD TITLE

CHICAGO, Jan. 7—Having regained failed to get more than 44 balls in a cluster. Then he ran 231, raising his line billiards, Jacob Schaefer of this city prepared to defend it against the second state of the control of the city prepared to defend it against the city prepared to defend the city prepared to defend the city prepared

the world's championship at 18.2 balkline billiards, Jacob Schaefer of this
city prepared to defend it again the
second week of March in response to
a challenge received from Erich
Hagenlacher of Germany. They will
meet at the Manufacturers' Club in
Philadelphia. Hagenlacher finished
third in the last international tourney
and was to have played in the second
challenge match; but the return engagement granted Schaefer by
Edouard Horemans of Belgium set the
German off one match.
Friends of Horemans state he regrets having agreed to the return enball decision by the 'championship
honors for a more extended period. He
held the title just 35 days. The dispute
arose in the first match over a frozen
ball decision by the referce, Schaefer
refusing to go on with the match
in titled to enjoy the 'championship
honors for a more extended period. He
held the title just 35 days. The dispute
arose in the first match over a frozen
ball decision by the referce, Schaefer
refusing to go on with the match
in thill a return engagement was proposed. It is believed that Hagenlacher
also regrets the turn of events, as he
would rather meet. Horemans than
Schaefer for the title.

Schaefer caught Horemans in an
exact reversal of conditions of their
former meeting. He led almost from
tha start and built up a great lead in
ach block, finishing 1500 points to
390. The only factors that saved the
Belgian from a compeler rout were
two high runs, 243 made in the first
block, and 231 made on his last aptenting a grand average of 93 12-16 points in
each frame against 55 10-16 for Horemans.

It will be hard for Hagenlacher to
beat a Schaefer game of the brand
exhibited in the final block. He averaged as a sepased 100, the first time
ha had been up to that figure since granted to the
had been up to that figure since granted to the return
for all at 170 and he played slowly,
with great caution. As he passed 200

Tilden May Visit Wimbledon Again

Friends Claim He Is Considering the Matter of Playing for U.S. Team

NEW YORK, Jan. 7 (P)—While the United States Lawn Tennis Association is preparing to send the strongest available teams of men and women stars to compete in England's championship at Wimbledon this year, there is no indication yet that the men's delegation will include the national champion, William T. Tilden 2d, nor his closest two rivals, William M. Johnston and Vincent Richards.

Tilden could not be reached here yesterdsy to comment on London dispatches giving the impression that his entry at Wimbledon already had been made, but friends of the six-time United States titleholder, denied he had done so, adding that while he was considering the matter, he did not expect to reach a decision for several months.

pect to reach a decision for several months.

Tilden, Johnston, Richards and R. Norris Williams 2d, America's "Big Four," will be the first invited to represent the U. S. L. T. A., which already has authorized sending two men and four women players. Julian S. Myrtck, chairman of the Davis Cup Committee of the Association, has as yet received no assurances, however, that any of these four will accept.

Tilden carried off the Wimbledon singles title in the only two bids he made for it, in 1920 and 1921. Johnston won the tournament in 1923, the last which carried with it the so-called "World's Championship." Richards' attempt in 1924 to lift England's premier honor was checked by J. Rene Lacoste, young Frenchman, and the tournament victor.

Lacoste, young Frenchman, and the tournament victor.

The entry of Miss Helen N. Wills. United States champion, already is assured by her trip abroad while the U. S. L. T. A. is expected to consider Mrs. F. I. Mallory, Miss Elizabeth Ryan, Miss Eleanor Goss and Mrs. J. B. Jessup for other places on the team.

HORNSBY WINS MORE LAURELS IN BATTING

Rogers Hornsby, sixth-time leading batter of the National League, also leads the National batters of 1925 in total bases with 381. With the exception of 1923, when F. F. Frisch of the Giants led, he has held this honor annually since 1920. H. S. Cuyler of Pittsburgh, J. L. Bottomley of the Cardinals and Z D. Wheat of Brooklyn follow in the order named.

Hornsby also leads in batting in runs with a total of 143. J. F. Fournier of Brooklyn was given 86 bases on balls, just three more than Hornsby for leading honors, while C. L. Hatnett, the home-run hitter of the Chicago Nationals struck out 77 times to lead in

tionals struck out 77 times to lead in this phase.

E. J. Roush of Cincinnati, whom nearly all fans know as one of the fastest men in baseball, was caught stealing bases 20 times, the highest total in the league. His total of 22 stolen bases was the third best in the league and the fact that he was caught so many times shows that he was alleague and the fact that he was caught so many times shows that he was always trying. M. G. Carey of Pittsburgh and Cuyler of the same club, leaders in base stealing, were caught stealing 11 and 13 times respectively. Cuyler was also hit by pitchers more than any other player in the league. Thirteen times he got to first base by this process. J. P. McInnis of Pittsburgh was a hard man to strike out. He was retired by this route only once in the 59 games in which he played.

BIG SQUAD OUT FOR PENNSYLVANIA CREW

PHILADELPHIA, Pa., Jan. 7-More PHILADELPHIA, Pa., Jan. 7—More than 250 carsmen yesterday answered the call of F. W. Spuhn and Max Luft, the new coaches at the University of Pennsylvania. For more than two hours the students kept pouring into the indoor fowing rooms under the north side of the Franklin Field Stadium. The former University of Washington carsmen immediately put the east The British champion tentatively accepted terms for a summer position in New York with the provision that he be permitted to return to England to compete for the British open champion in Florida next winter He is here with Arnauld Massy, French open titleholder, for a series of international matches. The British professional champion has no cluo connection in England and will no connection in England and will pretty combination play, the former university of washing the British professional champion has pretty combination play, the former the machines.

the machines.
"I look for an open scramble for championship rowing honors in the East this year," said Head Coach Spuhn, who succeeds J. A. Wright. The far West system has been adopted by a number of eastern universities including Yale, Harvard and Princeton Universities, the United States Naval Academy and University of Pennsyl-

"The Glendons will help Columbia and I look for the best college rowing season the East has ever known."

EUROPEAN SPORTS NOTES

LONDON, Dec. 18 (Special Correspondence)—Miss Jean McDowall of the Warrender Club established a fresh Scottish national women's free-style swimming record at Edinburgh recently, when she covered 100 yards in im. 10%s. The previous best time was im. 11%s.

The provisional acceptance by the English Football Association of the Canadian F. A.'s invitation, makes it appear highly probable that a strong team of soccer players from the motherland will tour Canada for six or seven weeks during the summer of 1986. Details have yet to be arranged, but the Englishmen are expected to leave these shores in the middle of May. It may be recalled that last summer an English team made an extensive tour in Australia, winning every match it played.

"Paticycling," which involves the use of skates specially adapted for the open road, made a leap forward in popularity when the first French national championship in this new sport was won by the internationally renowned roiler expert, Charles Samuel. Big crowds assembled along the route from Versailles to Paris and as far as the Porte Maillot the leading competitors were accompanied by several hundred cyclists, Charles Samuel and his brother. Joseph, set a cracking pace at the outset and, at Sursenes, Joseph seemed to have the race well in his keeping, but brother Charles had sufficient reserve to take the lead once again and crossed the finishing line with some 25 yards to spare, A third member of the Samuel family, Robert, filled third place.

Charles Rigoulot, the young Frenchman who won the Olympic heavyweight weight-lifting title last year, and has since gone over to the ranks of the professional "strong men," yeave great delight to a big crowd at the Cirque Royle, Brussels, recently. After he had raised a triffling matter of 150 kilograms (approximately \$20% pounds) with the two-handed snatch, he made four unsuccessful attempts at a weight announced as 157k, 500. His fifth essay was successful, and when the disk-laden bar was placed upon the scales it was found that, instead of

TO BREAK GROUND IN SPRING TO BREAK GROUND IN SPRING.

EVANSTON. III., Jan. 7 (Special)—
Northwestern University is planning to break the first ground for its proposed new athletic stadium as early in the spring as the weather will permit. Work will then proceed rapidly, and it is confidently believed that the initial structure of two decks with 49,000 permanenit seats will be completed by the opening of the football season in the fall.

GERAED WINS SHOOT
PINEHURST N. C., Jan. 7—J. N. Gerard of Columbus, O., won the weekly
100-target trapshoot here yesterday when
he broke \$4 targets. His handleap of 16
gave him a total of 99. H. A. Page Jr.
of Aberdeen, H. D. Kirkover of Buffalo,
George Magoon of Pittsburgh and W. W.
Windle of Millbury, Mass, tied for second at the

Argentine to Enter Davis Cup Tourney

By the Associated Press Buenos Aires, Jan. 7 THE Argentine Lawn Tennis Association today decided to enter a team in the 1926 Davis Cup matches.

CALGARY GETS FIRST VICTORY

Defeats Saskatoon, League Leaders-Vancouver Also a Victor

WESTERN HOCKEY LEAGUE

CALGARY, Alta., Jan. 7 (Special)—Calgary secured a much-needed victory by defeating Saskatoon 1 to 0 in a hard contest here last night. The whole game proved a good comparison of two methods of attack. Saskatoon persisted in keeping a forward line three abreast while Calgary kept to two-men rushes with the third man back just as far as the new anti-defense rule will allow. Leaving out of consideration the soft ice, it would appear that the latter method was the best, for even with Briden and Sparrow out of the game, the Tigers were able to keep a steady pressure on the opposing defense.

The Saskatoon onslaughts were very

to keep a steady pressure on the opposing defense.

The Saskatoon onslaughts were very fast, but the third forward of the Calgary team usually enabled his defense to break up the play. At the first bell a Saskatoon rush beat the defense, drew Winkler out, but in the scramble Headley saved. Duncan broke away on a lone rush and so nearly succeeded that he was watched closely for the rest of the game. Macfarlane plowed through alone, stumbled, recovered, was checked and somehow the puck slid in for the one goal of the evening.

In the second period several of the players resorted to long shots in the hope that the puck would roll in on the sticky ice. Gardiner brought the crowd to its feet when he stickhandled cleverly to the goal mouth only to have Hainsworth save. Another easy chance was lost by Saskatoon when three was gloted the Calgary defense but

was lost by Saskatoon when three men eluded the Calgary defense but failed to score. Wilson was held as he was about to score in the third period and Duncan failed to beat Hainsworth with the penalty shot. Gardiner re-peated his clever rushes supporting Oliver well. Duncan was through the entire Saskatoon defense but failed to

entire Saskatoon defense but failed to score.

Säskatoon, beginning to rally, had their agile forwards—Scott, F. Cook and Denneney—back-checking desperately, but Oliver broke clear and made a fine individual effort around the visitors' goal. Denneney made just as fine a one in return, but could not score. A Gardiner rush ended in a heap of players and a wild scramble around Halnsworth, but no score rearound Hainsworth, but no score resulted. Oliver even surpassed his usual brilliancy and along with Gardiner, was the best of the wimers. Dennency, Hainsworth and W. Cook excelled for the visitors:

Caligary Saskaroon

PORTLAND, Ore., Jan. 7 (Special)
—Vancouver won last night's Western
Hockey League game here from Portland by a score of 3 to 2. Portland
opened with a rush which netted the
Rosebuds a two-point lead in the first period. Vancouver tied it up in the second session with two quick goals, and, just before the intermission, big Moran shot the Marcons into the lead with a long goal up from the side wall after skating the length of the

ice.
Captain Irvin shot the first Portland
goal on a pass from Hay, and McVeigh
scored the second with Trapp assistcouver, gssisted by Arbour; MacKay
scored the second and Moran the third,
unassisted.

In the third period Vancouver went

BUSY SEASON FOR COLUMBIA FENCERS

NEW YORK, Jan. 7—Columbia University's fencing team will engage in a total of 13 meets this season, besides participating in the intercollegiates at the Hotel Astor on April 1 and 2. The Blue and White, is slated to open its season in its own fencing room on Saturday by taking on the J. Sanford Saltus Club. The clubmen will be met twice, their second meeting being scheduled for the following Saturday, also at Columbia.

After this the Lions will take things easily on account of the midyear examinations, resuming competition on Feb. 6 against the United States Military Academy at West Point. Five more dual meets, with Cornell University, Massachusetts Institute of Technology, Yale University, Hamilton College and Harvard University will then take place before Columbia engages in a five-cornered meet.

This unusual gathering will bring Columbia against United States Naval Academy, University and Princeton University at Annapolis on March 20. On account of the large number of competitors the folls events will take place in the afternoon and the saber and epee in the evening.

Jan. 9 and 16—J. Sanford Saltus Club. Feb. 6—Unifed States Millitary Academy; 13—Cornell University; 19—Massachusetts Institute of Technology; 27—Yale University at Cambridge; 20—United States Naval Academy, University, of Pennsylvania, New York University, Princeton University at Annapolis; 21—New York Althetic Club. funior varsity (folis only) at New York University.

PURDUE LACKS GOOD GUARDS

Basketball Team Did Well in Pre-Season Games,

However

LAFAYETTE, Ind., Jan. 5 (Special)
—An unusually full quota of experienced forward candidates coupled with a lack of experienced guards makes the basketball prospects at Purdue University of a rather indeterminate hue, although the loss of last year's star defensive players, Capt. F. J. Wellman '25 and W. H. Robbins '25, seems to be more than counterbalanced by much of offensive talent battling for forward posts this year. Coach W. L. Lambert with characteristic pessimism seems rather downcast at the prospects and refuses to give any consolation to the Old Gold and Black fans looking for an Intercollegiste Conference title winner. From the way his quintet has been performing, however, in pre-Conference season games it appears likely that Purdue will at least provide lots of excitement before the title is decided.

Coach Lambert is a strong believer in the basketball theory that a strong offense is a strong defense for he has been defilling his squad to perfect a short passing game with few dribbles to work the ball under the basket for snap shots. The Purdue offense so far this season has been characterized by few long shots, the forward as a rule waiting until they could work the ball under the basket for snap shots. The Purdue offense so far this season has been characterized by few long shots, the forward as a rule waiting until they could work the ball under the basket for snap shots. The Purdue offense so far this season has been characterized by few long shots, the forward as a rule waiting until they could work the ball under the basket for snap shots. The Purdue offense so far this season has been characterized by few long shots, the forward to far this season has been characterized by few long shots, the forward to far the saket with passes before they made an attempt for a field goal.

With Capt. G. C. Spradling '26 for

Spradling at Forward With Capt. G. C. Spradling '26 for one of the forward posts, Lambert's concerns in that direction cease. Spradling is one of the greatest offensive players in the middle west, and in his first year of Intercollegiate Conference competition led the Conference in scoring. He displays exceptional

skill under the basket, charging into a scramble on a follow-in, to emerge with the ball and make a goal from a seemingly impossible angle. Four other candidates are battling for the other candidates are battling for the position as Spradling's running mate at forward—H. L. Harmeson '26, M. H. Taube '26, P. W. Neuman '26, and E. F. Pierce '26. Harmeson, letter man from last year, covers the floor well, and is one of the specialty last season wan a shot taken on the run under the basket after receiving a long pass, and if he finds his eye this season he should provide plenty of work for opposing guards. Taube, Neuman and Pierce are all dependable men, although Pierce lacks the experience of the other two.

the other two. C. C. Cramer '26 seems to be a permanent fixture at the center position. He is rangy, an accurate shot, and tall enough so that he gets the jump a good percentage of the time. In regood percentage of the time. In reserve for the pivot position Lambert has A. B. Stevenson '28. L. O. Hodges '28, at present incligible due to scholastic difficulties, may break into the game the second semester, and if he does will push either Cramer or one of the forwards for a regular position.

Three men are out for the regular post of floor guard. Two sophomores, R. D. Wilson '28 and C. R. Wilcox '28, seem to have the edge over C. C. Rigsby '26, a reserve letter man from last year. Wilcox is the flashier of the two sophomores, while Wilson has had a little more experience and plays a steady game.

Jolly Out Again

emerged from its pre-Conference games with several outstanding vic-tories, the most notable being the 32-to-24 defeat of Franklin College.

follows:

Dec. 8—Purdue 23, Indiana State Normal 24; 11—Purdue 49, De Pauw University 39; 18—Purdue 32, Franklin College 24; 31—Purdue 27; University of Missouri 26.

Jan. 4—Purdue 38, Wabash College 37; 9—Ohio State University at Columbus; 12—Ohio State University at Lafayette; 16—Northwestern University at Lafayette; 20—University of Chicago at Chicago; 22—Indiana University at Bloomington.

cago; 23—indiana University at Bioomington.

Feb. 10—University of Illinois at Urbana; 13—Indiana University at Lafayette; 17—University of Chicago at Lafayette; 20—University of Wisconsin at Madison; 26—University of Wisconsin at Lafayette.

March 1—University of Illinois at Lafayette; 6—Northwestern University at Evanston.

Queen's' Is Winner Over Princeton 4-0

NEW YORK, Jan. 7—The fast Queen's University hockey team made a cleanup of its invasion of this city last night when it defeated the Prince-

a cleanup of its invasion of this city last night when it defeated the Princeton University sextet at Madison Square Garden by a score of 4 to 0. The Nassau team was out-played by faster skating and better-schooled opponents but fought hard to the end. Pitman refused to quit.

The staying power of Queen's told, for after countless times Voss finally broke through for a clear shot, and made three goals after this in rapid succession. Colebrook spoiled shots for middle loe by falling on the puck. This is the third game the Tigers have lost here. The Royal Military-Academy and Montreal University defeated them in the opening of the college season in the Garden. The Grange and Black showed up better last night, but they were facing as good a college combination as the Garden crowds have seen. Boucher, Lindsay and Legon are a fine array of forwards all straight shooters and above all, team players. Voss is as good on the attack as defense. If the game can be arranged Queen's may come back in March if they win the Canadian College title to play the best of the American University team.

Hallock and Davis did well for the Tigers, but their real star was Colebrook, the goalie, who had to ward off Tigers, but their real star was Cole-brook, the goalie, who had to ward off half a hundred shots rained on him from all angles by the Queen's lads.

QUEEN'S Soucher, lw.

Set Seven World Records in Recent Invasion of

BRAVES' ACTION MAY

FORECAST NEW CIRCUIT NEW YORK, Jan. 7 (P)—Entrance of the Boston National League Base-all Club into the professional football field, as announced yesterday, may forecast a gridiron circuit on the very lines of the National Baseball League. Several cities in the National League have professional football clubs al-though not under baseball management. Among them are New York, Chicago, Pittsburgh, St. Louis and Philadelphia. Four of these are Ameri-

Philadelphia. Four of these are American League cities as well.

The New York Glants, operating at the Polo Grounds, but owned outside the baseball organization, had a successful year in their first appearance, all things considered. The team paid for itself, which is remarkable in the first year of a sport on such a tremendous scale. Every seat in the stands was filled and many persons stood throughout the game in which H. E. Grange performed with the Chicago Bears.

Brooklyn has sought a franchise fo next season. Two are held by New York football promoters, one of which is not in use and the 1926 situation is somewhat vague. The Braves announce that they are making the move as an economic venture designed to as an economic venture designed to fill the great stadium after baseball ceases, and baseball promoters in other cities soon may become inbue with the same desire for economy. There were 18 teams in the National Football League the past season and there were rumors that another year would see 10 elevens in the east and 10 in the west, the division winners to play a "world series."

HOCKEY NOTES

Raymond Jolly '27 is easily the pick of the back guards. Jolly is well built and rangy and can stand a lot of punishment. He handles the ball well and is a fairly good shot, which makes it possible for him to figure in the forense as well as the defense. Jolly's understudy is H. O. Wright '27, another rangily-built man, but who has had little experience at the guarding position, having played either forward or center in former years.

Purdue will meet most of the teams in the "Big Ten" Conference that are expected to have a chance for the title, including Indiana University, tuniversity of Illinois and University of Wisconsin. The Old Gold and Black now located in Springfield, Mass.

Too many of the Ottawa fans play hockey themselves to have time to view the Senators in action. That may ac-count for the financial losses of the

Sons of Ireland and Montreal Vic-torias are having quite a battle for the Quebec Amateur Hockey Association lead. They meet tomorrow night, and the Sons will either increase their one-game lead or Victoria will tie. Forewarned is forearmed—t. ave a vastly improved team.

KIECKHEFER WINS SERIES

RIECKHEFER WINS SERIES

Special from Monitor Bureau

CHICAGO. Jan. 7—A. H. Kieckhefer of this city took a majority of the six-game series with A. K. Hall, also representing this city, in the title race of the National Championship Three-Cushion Billiard League, by winning both games yesterday. His counts were 50 to 46 in 13 innings and 50 to 49 in 69 innings. High runs of 6 and 7 were made by the winner, a pair of 5s by the loser.

HARVARD HOLDS TORONTO TO 2-0

Hudson Scores Two Goals in Early Minutes-Crimson Checks Rigidly

University of Toronto has disposed of all college hockey opposition with ease at the Boston Arena and before the contest with Harvard University, was rated about five goals superior to the Crimson skaters, but at the conclusion of their contest last night Toronto had only two goals, the score being 2 to 0. The Crimson, as usual, gave Toronto a battle from start to finish. Louis Hudson, Teronto right wing, made victory possible for the Canadians by scoring two goals past Capt. Thayer Cumings '26, Crimson goalle, within the first six minutes of play and after that the visitors were play and after that the visitors we

unable to tally.

Toronto had by far the superior stickhandlers and skaters; but the Crimson players were in better condi-Crimson players were in better condi-tion and by frequent substitution, were down the Canadian rivals. Har-vard's close checking was most an-noying to the opponents and they found it extremely difficult to evade the Crimsonites to obtain a clear shot. Hudson flashed early in the fray and by spectacular speed and skating, rounded the Harvard net with the Crimson players all trying to stop him. rounded the Harvard net with the Crimson players all trying to stop him, but he came out in front again and whipped the puck by Cummings, Later he again scored after stick-handling past the Crimson defenders, Harvard's offense functioned surprisingly well but lacked finish around the nets, Time and again the Crimson advanced close to the Toronto goal mouth, but the passing and shooting was weak when opportunities ware

mouth, but the passing and shooting was weak when opportunities were brightest. However, much credit must be conceded the Cambridge University, for its hockey team gave Toronto the hardest battle of the week. the hardest battle of the week.
Hudson, Captain Sullivan, in goal,
and Plaxton excelled for Toronto.
while J. P. Chase '28 in center, L. O.
Pratt '26 and E. S. Clark '26 on the
defense and Captain Cumings in goal were exceptional for the losers. The

summary:

ONLY TWO CHANGES IN MACK'S ATHLETICS

PHILADELPHIA, Pa., Jan. 7 (By The Associated Press)—Only two changes for the 1926 season are in prospect for the Philadelphia American League Baseball Club, runners-up in the American League race last season.

The most important shift concerns right field, where W. E. French, who played so brilliantly toward the close of 1925, is slated to succeed Edmond Miller as a regular. The other involves the expected return to first base of J. J. Hauser, who was unable to play last season.

otherwise Connie Mack stands pat on the team that set such a fast pade in 1925 until September, only to collapse in the face of Washington's brilliant finish. Mack expects stronger opposition from nearly all the clubs this year, but is confident that his combination of worth and expects are this year, but is confident that his combination of youth and experience, benefitted by additional experience, will make a strong pennant bid. He has one of the hardest-hitting outfields in the game and an infield quartet of more than average ability. A factor which may affect the Athletics' team play considerably is the engagement of William Gleason, former White Sox manager, as a coach and member of Mack's "board of and member of Mack's "board of strategy," which already includes J. L. Thomas, battery tutor, and the man-ager's son, Earl Mack.

REISELT DEFEATS LAYTON REISELT DEFEATS LAYTON
PHILADELPHIA, Pa., Jan. 7 (Special)
—By dividing the last pair of tilts, Otto
Reiselt of this city captured the majority
of the six-game series with J. M. Layton
of Milwaukee, former champion, in the
title race of the National Championship
Three-Cushion Billiard League. Reiselt
won the first 50 to 49 in 57 innings, dropping the second by a score of 50 to 39 in
49 frames. The local made high runs of
5 and 6 against 4 and 5 for the visitor,

BALTIMORE GETS TOURNEY BALTIMORE GETS TOURNET
BALTIMORE, Md., Jan. 7 (P)—The
second annual Middle States Conference
tennis championships will be played on
the Johns Hopkins University courts on
May 15 and 22. Dr. E. Leroy Mercer,
head of athletics at Swarthmore College and chairman of the Middle States
tennis committee, has requested Hopkins
to handle the event. There are 26 colleges in the Conference.

CAPELLO AND BOYD WIN PINEHURST N. C., Jan. 7—Cyrll Walker of Winterhaven, Fla., and T. L. Kerrigan of Siwanoy, New York, lost an exhibition golf match, here, yesterday, to Joseph Capello of Hyannisport, Mass, and Thomas Boyd of Foxhills, by 3 and 2, on the championship course.

CYLINDRICAL COILS BETTER SAYS BUREAU

Government Engineers Give Data on Coil Winding for Set Builders

WASHINGTON, Jan. 7—If you wind your tuning or inductance coils in the construction of homemade adio receiving sets, it is advisable o experiment with different sizes and types of wire to be used for this purpose. This suggestion is justified by the results of an extensive investigation by the radio laboratory of the Bureau of Standards in which this conclusion was reached, namely, that "no single size or type of wire is suitable for all inductors, but that in order to obtain the best re-sults different kinds of wire must be used on the coils for different frequency (wavelength) ranges."

The searching tests of this Government radio laboratory embraced the whole subject of inductance coils. Typical tuning units—the kind you will find in any radio receiving set—were built and were adjusted to have the same inductance at the low frequency of one kilocycle. Measurents were made of the resistance and inductance at wavelengths covering the entire band assigned to 20 to 560 meters. The coils subjected to this searching investigation included several types made up of solid and Litzendraht wire, single and multiple-layer coils of several ypes of winding, single-layer colls of various sizes of wire, and singlelayer coils covered with different kinds of insulating binder.

Of value to radio amateurs and radiocast listeners who "roll their own" was the study made incidental that of determining the properties inductance coils. That is to say, order to increase the sharpness of tuning of some of the wavemeters of the radio laboratory of the Bureau Standards tests were made of the radio-frequency resistance of induc-tance coils used for this purpose. Tuning coils were made of various types of conductors, including solid copper wire, copper tubing, and Litzendraht wire of various sizes, and resistance measurements made

at varying wavelengths. If you are winding your inducor tuning coils in many shapes -flat, round, hectagon, octagon, etc. oratory of the Bureau of Standards d let them take a cylindrical shape. This series of exhaustive tests confucted by this Government radio research laboratory are productive of results showing that when the wires of a tuning unit are wound on a cylinder-like form the complete incoils assuming other shapes. In other words, in the popular language of the day, cylindrical coils may be considered "low loss," whereas other shapes might not qualify under this

Radio amateurs and fans in the past may have selected other forms—for instance, spiderwebs and round shapes—as possessing the greatest efficiency. Tests may have apparently justified this choice. Now, however, conclusive tests by the Bureau of Standards point with preference to cylindrical coil as a form best suited for radio work, taking into consideration that wires on a cylinder are most capable of effectively Radio amateurs and fans in the consideration that wires on a cylin-der are most capable of effectively handling the minute electrical en-

ergy in your radio receving set.

Inductance coils, their shapes, the kinds of wire, and other factors in their make-up, constitute such an important subject that the radio laboratory of the Bureau of Standards is Stept. 19:39—Freddie Rich's Astor Grill Orchestra. ergy in your radio receving set.
Inductance coils, their shapes, the sending to press a technical paper, which discloses results in detail of exhaustive laboratory experiments. In due course of time—within a period of several weeks—this publica-tion will be available for free distribution or may be purchased from the Government Printing Office. Meanwhile, if you "roll your own" vind the wires around a cylinder

I wish to build a good one-tube reflex set, and write to ask if, with all the developments of the past year, you would recommend following the diagram as given for such a set in the Monitor on May 28, 1924.

Would it be advisable—or, rather, would it be good radio design—to use a standard 35, 50, and 75-turn honey-comb coil in this set? I am partial to the reflex design simply because of the better quality of tone that is possible through a crystal, even though I understand one must forego the convenience of being able to chart the dials so as to tune in at fixed positions for certain stations. W. W. H., Worcester, Mass.

to tune in at fixed positions for certain stations.

W. W. H., Worcester, Mass.

(Ans.) Regarding a one-tube reflex, we would refer you to our issues of Dec. 14, 16, and 18. Honeycomb coils might be used in this circuit, but they would not be nearly as efficient as the coils specified. The crystal certainly does give clear rectification. The second dial may be charted in the floating circuit reflex, which will make it very easy to tune. This dial is set at the proper point and then the first one is turned to a point where the signals are loudest. This operation is technically described as "bringing the first circuit into resonance with the second."

RADIOCASTERS JOIN RADIO WEEK COMMITTEE

NEW YORK, Jan. 7-Five mem-Broadcasters will be members of the Radio Week, according to recent announcement from the association. Those appointed by the radiocasters to serve on the committee were Frank W. Elliott of WOC, Davenport, and president of the Radiocasters' As-

WHITE BILL IS INDORSED BY RADIO LEADERS

Herbert Hoover Reasserts Need of Government Control

WASHINGTON, Jan. 6 (P)-The White bill to provide for control of the radio industry was indorsed today before the House Merchant Ma-rine Committee by Secretary Herberi Hoover and other members of the Commerce Department, officers of the navy and coast guard and represen titives of radio and telephone organ-

zations.

The bill would give the Secretary of Commerce administrative charge of radio and would establish a comtions for licenses and perform other

similar functions.
Asserting that Government control was necessary to prevent chaos in the air, Secretary Hoover testified that no one person was "wise enough" to decide which city, company or in-dividual should have the right to a certain wavelength in a region. With disapproving petitions, he pointed

out, disappointed applicants would have the right to appeal to the courts. Solicitor Davis of the commerce department, in response to questions having to do with the provisions in the bill against monopoly, testified that there could be no "vested interests" in radiocasting and that

there was no danger of monopoly. Possible censorship of radio programs was discussed, and Representative W. H. White, Republican, Maine, author of the bill, observed that some day it might be necessary to determine which should have priority on given wave length, a church service

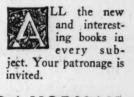

or a jazz concert.

The bill was approved in theory by Capt. Ridley McLean, chief of the naval radio service; Lieut. E. M. Webster of the Coast Guard; John Nicholason of the Shipping Board: William Brown of the Radio Corpora. tion of America, and W. E. Harkness of the American Telephone & Telegraph Company.

Architecture—Theaters—Musical Events

Architecture in Georgia

By ARTHUR NEAL ROBINSON

THE first settlement in the Province of Georgia was made by James Oglethorpe, who brought from England 35 families of about James Oglethorpe, who brought from England 35 families of about 125 "sober, moral, and industrious persons," who landed the 1st of February, 1733, and founded the settlement of Savannah. On the afternoon of Feb. 9, 1733, the first house to be erected by the settlers was begun.

Among the oldest of the buildings that are standing today is the residence of General Lachlan M'Intosh, in Savannah, which was constructed visitor may pass stately Italian vil-

architecture were used, the Georgian, and the Greek or classical revival. In and the Greek or classical revival. In the latter style was being developed a type that seemed especially favored in the south, where, with its genial climate of sunny days and balmy nights, this style of residence with its large columns and broad porches, proved to be very popular. These old mansions were indeed beautiful

Reconstruction Period During the reconstruction period, after the war between the States, and for many years thereafter, in which thousands of buildings and dwellings had to be replaced on account of the losses of the war, the one controlling factor in the buildings was purely utilitarian with no pretense of archi-

tectural refinements.

As the wave of prosperity spread over Georgia and the south, the value of the best designing and planning in the architectural line began to be realized and appreciated on every and. Within the last two decades architecture has made rapid strides, and much progress has been shown by the increasing interest in the designs of the buildings of every type that have been erected.

The State, municipal and civic buildings show that much study has been given to each problem. They are dignified and monumental; planned to serve their purpose, and also to express the solidity of the State. Usually they are designed in the classical styles and built of materials chosen not only for their beauty but their durability, so they will with-

stand the elements for years to come. Throughout the State are to be found many modern churches that are worthy examples of the various

advantages of the city as a central gathering place for com-

was that the schools should all be designed in a type of architecture that prevailed in north Italy, with the result that all sections of the city fared equally welf, and since each school was designed by a difference of the city fared by a difference of the songs with the so suit that all sections of the city fared equally welf, and since each school was designed by a different architect there was no monotony in the there was no monotony in the exe-

In regard to our universities it may be said that the advisability of studying the entire layout, and planning and designing the buildings relative

commodate.

There are many large mill towns throughout Georgia, and more and more mill owners are realizing that the well-housed and well-cared-for employees simplify labor problems and increase the output of the mills. To that end, one will find in these will the mills of the mills. mill towns commodious community houses designed to take care of the recreational hours of the employees, beautiful churches, and cottages that

conveniences.

The tourist will find that Georgia is well equipped with fine hotels. Each year sees the erection of more freproof hotels, each of pleasing design and equipped to meet the demands of the most fastidious guests. This is not only true of the larger

AMUSEMENTS

WM. in THE JUDGE'S HUSBAND

cities but as the tourists continue to pour in, the smaller towns are building hotels and inns which are creditable additions to their communi-

dence of General Lachlan M'Intosh, in Savannah, which was constructed several years before the Revolutionary War. Another building is the Independent Presbyterian Church, also in Savannah, which is considered by some to be one of the finest and most beautiful churches of the Georgian type in this country.

There are to be found, all through Georgia, many interesting buildings that were constructed between the time of the Revolutionary War and the war between the states. For the most part two distinct styles of architecture were used, the Georgian,

Special from Monitor Bureau

London, Dec. 18 YNTIL lately the compositions of Bernard van Dieren have been better known by what has been said about them than by themselves. Where a few hundred people with their verdant lawns and color-ful gardens; and they commanded the admiration of all who saw them. or hotly defended in print. Then sporadic performances increased, and on Dec. 14 a whole concert, given by John Goss, at Wigmore Hall, was devoted to the chamber

work of Van Dieren.
After listening for three solid hours, it is a little difficult to understand why this music should have excited controversy. Some of it is beautiful—there can be no two words about that, and most of it is in-dividual, and some of it is intermina-ble. It wells into sound from what seems a constant natural spring, and this abundance is its present bane and best promise for the fu- Clavilux Accompanies ture.

The program provided a liberal selection of works: Two French poems as recitations to string quartet, nine songs with piano accompaniment, a string quartet (No. 3) in four movements (whereof the first of alone was the length of an average quartet), several sketches for pianoforte, a scene from a comic opera, "The Tailor," and an intermezzo

are worthy examples of the various styles of architecture, such as the brioli's Chamber Orchestra, one was Gothic, Tudor, Romanesque, Colonial, Georgian, Italian Renaissance. The beauty of some of these edifices has when writing music connected with the definite forms clavilux stood near the footlights in beauty of some of these edifices has attracted attention from all parts of our country.

School Architecture

The importance of the school is being fully realized and coped with in Georgia. Rapid strides are being made in the srection of new school buildings. These are of the most modern type and conform to the high-est standards as laid down for them best authorities in the country.

Such and the definite forms attracted attention from all parts of our country.

Special from Monitor Bureau

NEW YORK, Jan. 4—Mme. Ethel Leginska started off what may be clavelux stood near the footlights in the center of the stage. Some 15 or 20 feet back of it was a large screen of black, perhaps 20 feet wide and about the same in height and covered bridging a concert with the same in height and covered bridging as concert with the same in height and covered bridging as concert with the same of the Philharmonic Organization. The string quartet flows, riverlike is and extending to the wings was modern type and conform to the high-est standards as laid down for them by order to the carefully reduced at twelve-days' festival of conducting, giving a concert with the same in height and covered to the same in height and covered bridging as concert with the same in height and covered bridging as concert with the same in height and covered bridging as concert with the same in height and covered was an extend of what may be clavilux stood near the footlights in the current of the office at the work is a single performance. The clavilux stood near the footlights in the carefully scaled and which and the carefully reduced of what may be clavilux stood near the footlights in the carefully reduced of what may be clavilux stood near the footlights in the carefully less started off what may be carefully reduced of what may be carefully reduced of the extend of the week was three fitted office. The carefully reduced of the other operation of the other operation of the week was three at same as an extend of the dark of the week was three fitted and planned to meet the requirements of the locality; and in them one finds passed a more indelibe impression. passed a more indelibe impression, acter of the music and the exotic orchestration. Mr. Wilfred, in his pillars of music, flinging across be"composition" of the color scheme, pillars of music, finging across between them the poem on the sympathetic thread of the human voice, a

chronization of the color-organ with

while those to German words were thoroughly imbued with German romantic formulas of the nineteenth century. The operatic extracts from "The Tailor" no doubt lost by trans-ference to the concert platform, but

ing the entire layout, and planning and designing the buildings relative to each other and in one style of architecture, has been found the proper method of procedure. We may point to Emory University with its numerous schools and library, all designed in an Italian type of architecture and all having pink and white marble for their exterior walls, as a happy example of the development of architecture in Georgia. Or, again we may cite Oglethorpe University, with its granite buildings in Tudor style as another beautiful result of studying each buildings a part of one big scheme.

Office buildings, in the main, are modern and of good design. The warehouses, some of which are very large, are substantially constructed for long life and as a protection for the property they are designed to accommodate.

"The Tailor" no doubt lost by transference to the concert platform, but in the recited one could at least observe Van Dieren's curiously individual way of scoring for each instrument.

Concert of German Music

Some of the finest traditions in its performance met in the recital given by Mme. Susan Metcalfe-Casalis and Miss Fanny Davies at Wigmore Hall on the afternoon of Dec. 14. Mme. Metcalfe-Casalis sang Beethoven and Schumann songs with a quiet control and shaping of phrasing akin to great instrumental art, and she gave much intimacy to her interpretations of modern Spanish songs by Granados. Miss Fanny Davies played works by Bach, Mozart, Brahms, Schumann, and Mendenson at the property they are designed to accommodate. delssohn as they should be played, and not as they are too often heard. Gaspar Cassado, the young Spanish

appeared in Carnegie Hall on the afternoon of Jan. 2, with Myron Jacobson as her accompanist. Included in her program were some songs in English which permitted her to display a voice of extraordi-nary power, richness and range, also a pronunciation of the rarest clearness and elegance. Musically a great marvel, Mme. Austral should prove one of the conquering singers of the year. If the slightest point could be brought against her, it would be a tendency toward a vibrating tone to which she gives wav on high notes. The Roosevelt recita's opened on the afternoon of Jan. 2 at the Hotel Roosevelt, Mme. Landowska, pianist and harpsichord player, appearing in association with a small orchestra of Philharmonic men, Mr. Mengelberg conducting, in a program of old-school works. It would be a dif-ficult audience indeed that these two artists would not move to enthusiasm No modern work performed for the first time is more exciting than a harpsichord concerto of C. P. E. Bach's or a piano concerto of Mozart's, presented in the manner which Mme. Landowska as antiquarian and Mr. Mengelberg as master-inter-preter deem authentic. W. P. T.

The Chicago Symphony; Progress of the Opera

Special from Monitor Bureau CHICAGO, Jan. 5-The "Mêlée Fantasque," by Arthur Bliss, was the novelty which the Chicago Symphony Orchestra presented to its patrons at the concerts Jan. 1 and 2. The English composer wrote this piece as a memorial to Claude Lovat-Fraser, a scenic artist whose work has been done with success in London. It is not, as most compositions of its type are, filled with lament, for Bliss's notion was to enshrine in sound the exuberant humor and the ebullient vitality of his friend. By that token "Mêlée Fantasque" is a spirited ex-cursion into creative art, filled with the harmonic and instrumental rapidly maturing artist has brought piquancies that are the delight of the a fusion of pictorial elements that dernists, and sometimes of their

given her first important opportunity this season in the music and action of Gretel and she achieved excellent results with it. Frank St. Leger conducted with tact and skill. F. B.

New Society Exhibit, New York

By RALPH FLINT

New York, Jan. 5 MID a certain pleasurable pomp Amid a certain pleasurable points and circumstance, the New Society manages each year to make its annual exhibition an outstanding event. Being as represen-tative an organization of American artists as exists today, and caring much for individual honesty of exearnestly strives to set its best foot forward at each yearly convention with the result that each exhibition really aggregates a tremendously ineresting total of invigorating art.

Guest Exhibitors The Anderson Galleries are again the scene of the New Society's mustering. There are three large salons devoted to oil paintings and sculpture, and there is a smaller room for water colors and one for drawings A new feature of this year is the in-clusion among the exhibiting members of a specially selected group of guest exhibitors. Thomas H. Benton, Andrew Dasburg, Rudolph Evans, Charles W. Hawthorne, Edward Hopper, Arthur Lee, Kenneth Hays Mil-ler, John Noble, Charles E. Pren-dergast and Robert Spencer are those so honored. Such a hospitality if discriminatingly pursued, will always insure a well-rounded exhibi-

As in other forgatherings of the Society, the picture most provocative and pertinacious inevitably came from George Bellows' brush, and so today, even after his passing, his work continues to make its accustomed stir. The large "Massacre." one of his deep-felt denunciations of war-time atrocities, holds the center of the main wall, with all the pictorial intensity and eloquence that he could command. It is a stirring, bluntly compelling canvas, one that spells the name of Bellows at the first plance. No other American painter has ever got to the point of such dynamic utterance in behalf of humanity as he, and it is well that his note is once more sounded at the New Society where he so delighted to exhibit.

"Polly Mary"

But the really great canvas of the exhibition is Eugene Speicher's "Polly Mary." Within the somewhat narrow limits of his frame this dutterly, a scene from a comic opera, "The Tailor," and an intermezzo from the same work added because, as Mr. Goss jocularly announced, "the concert was rather short."

of "Oriental Poppies." This painting being the best work he has shown is apparently a simple matter of a in some time. Among the other table top, a vase of orange-red flow-artists contributing to the excellence ers, and certain background bits of of the New Society's exhibition must hanging stuff and angling wall sur-faces. It looks an easy thing to do, rice Sterne, John Noble, Van Perrine, until a close examination reveals the Robert Henri, Charles W. Hawthorne, subtle ways that Mr. McFee has in telling about table edges and pockets of shadow; and then the marvel of the thing begins to unfold. The rather ordinary elements of this pictorial incident begin to take on that cloak of mystery which all great art spreads over nature, a tangible mystery yet still an unknown quantity. Here, too, as in the Speicher study, all thought of technique is held in abeyance by the artist's resonant purpose. This painting goes to the right spot and sticks. A second canvas by this young artist is also shown, a landscape done in the mod-

ern way but containing little of the pictorial strength of his still-life. Prendergast's Panels

A group of panels by Charles E. Prendergast is one of the features of the exhibition. Working with burnished gold and transparent color over gesso surfaces, cutting on occasion with delicate strokes the plaster ground to further richness of effect, this designer has evolved keeps pace with his sprightly color

cellences. Two large and dominent canvaces, Leon Kroll's "My Wife's Family," revolutionary mood—is an amplitude and Gari Melchers' full-length portunate and constantly shifting positional management of the constant of Kroll returns to his sylvan grouping libretto and something not at all again, although he has not carried grand. In fact, so far from grand this particular country idyl to the that it is of the most ordinary burdynamic aspects of his sitter to the exclusion of any charming intimacy, else to charm that, strangely enough, so that while the canvas is thor-oughly striking, it is hardly an attractive portrait.

characteristically managed as to un-compromising subject matter, but work required by the role a voice of lacking those admirable qualities grand opera power should have been that he packs into his brilliant etchings and water colors. Andrew Dasburg's portrait of a man done in the Ula Sharon is one of the most exmodern manner of self-determined quisitely lovely dancers in the world. Coloration and constrained chiaroscuro is also one of the high lights of the exhibition, and fully entitles him to fellowship in this body of artists. George Luks sends a vigorous study of a man playing the accordion, and Thomas Benton's three stylized essays on "New Eng-

artistic!

Perigueux had burst into markets overnight. Not one, not two, but at every sturn. Near the hotel was a market for old things. On the place before this frigid strain, but not place. Everything takes on its healty significance, importance, below is store where a dozen or twenty men were hudded round a feeble stoyed of its relation to its surroundings, because of its place in a scheme. Consider the fender not as a piece of ironmongery, but according to its function (as Plato would exclaim, "Laugh and grow warm!" One word and the action to the word by extrained and the stall ward conditions of the function (as Plato would say), and the stall ward to the word warm! One warm is specially its ships with a radiance that no ordinary piece of metal of ironmongery, but according to its function (as Plato would say), and immediately it shines with a radiance that no ordinary piece of metal can boast. The place for a fender is certainly not in a foundry, por in can boast. The place for a fender is certainly not in a foundry, nor in a department store, nor yet in an attic, but near a fire. To everything its place, and everything in its scason.

Sing a song of seasons

coveries which have helped forward divilization, Mr. H. G. Wells gives fourth place to the discovery of fire, in the village with its red tites. was made, he says, as the first fire was probably a plaything, then it was used to ward off attacks on dewy pastures, dewy trees, of wild beasts; finally used for cook- Softer than sleep-all things in order ing, heating, lighting, hauling, it has become the tremendous power we have today. From a thing of wonder nd worship, a thing to play and onjure with, fire has developed to a thing of beauty and a joy forever. We take it for granted now. Scarcely ever do we think of the difference it has made to human existence. One cuckoo, were as nothing compared great thinker has told us that the with inglenook and firelight. Since eason the Romans did not discover pots in which to boil and cook. So steam had to wait to be discovered as power till Watts, feet on fender, have thoughtfully at the life of the British strength of character and the greatness of English literature are due to Inglenook and Fireside. ed thoughtfully at the lifting lid

Fire has all sorts of associations. forth some of the finest bits of Some are delightful, as the cleansing literature we possess. The walls of fires of October days. Fires then suggest "seasons of mist and mellow fruitfulness"; but fire also conveys paper upon them, the armchairs, the the idea of stoves, furnaces, dust carpet, even the furniture, may hint and ashes, and the drudgery of cart-that time has dealt none too kindly ing ashes up the awkward cellar here. But sit in the room in the fire stairs. The progress of civilization light's ruddiness, and presto! what a bas given us fire, but our modern change. All is mellowed in tints and has given us fire, but our modern materialism with its various inventions and heating abominations has nearly put it out! They have nearly annihilated the candle and oil lamp with their lovely mellow glow, and now we are given camouflaged electric bulbs, radiators painted in silver and bronze, and decorated brackets and hot-air registers. But none of these can take the place of the fire

and the fender.

For the last six decades or so American homes have been built mainly minus a fireplace. This deprivation has been entirely due to the advances of the latter half of the mineteenth century materialism, which gave so many things with one hand and took so many away with make up for this loss. I recall an Englishman who went to the American West. He arrived in Oc-tober when the days were rapidly growing chill Before long the winds

that the needles could not have been in the few simple lines of the etching.

'Love's Labour's Lost'

Something more remains, and that something highly characteristic of Shakespeare. Here is a play studiously fantastic, occupied with eccentrics and deliberately pushing them up to the top of their folly. But let

russet yeas and honest kersey

Was that the king that spurred his horse so hard Against the steep-up rising of the

The genius of Shakespeare, in short, which could do most things, could not (even if it tried ever so hard) treat foppery and leave if at foppery. In "Love's Labour's Lost," if anywhere, he had a chance to per-form this silly feat; but we have only to compare it with any given play of Lyly's, to recognise a something in the man which (under Heaven) defeated the attempt. Pater

of its wit and postry. The scene—a park of the King of Navarre—is un part of the king of Navarre—is un-aftered throughout; and the unity of the play is not so much the unity of a drama as that of a series of pic-torial groups, in which the same fig-ures reappear, in different combina-tions but on the same background. It is as if Shakespeare had intended to bind together, by some inventive conceit, the devices of an ancient tapestry, and gives voices to its figures. On the one side, a fair palace: on the other the tents of the Prin-cess of France, who has come on an embassy to the King of Navarre; in the midst, a wide space of smooth grass. The same personages are combined over and over again into a series of gallant scenes—the prinpendent on clothing for warmth, and wodllens were practically unknown. Hence all those who could afford it were great garments lined with this. Having disposed of his cargo, Gray had turned in the direction of the Cape of Good Hope and home. Thus he had been the first to take at American vessel around the world agrance. Greenble and Marjorie Greenble, in "Gold of Ophir."

amiable kings men have never loved enough, whose serious occupation with the initial serious occupation with the things of he mind seems, by contrast with the more usual forms of kingship, like fivelity at play."

And this is well add, and sets the scene. But behind it, and around and above and interpentating if swims that vision—that knowledgeable vision—that intimate inderstanding of his native Arden, core of rural Enghis native Arden, core of rural Eng- speare).

The End of Human Wisdom

Translated for The Christian Science Monitor Most human beings seem to me To act like big children, Who to the mart with their scant money store Greedily hasten. While yet their pockets hold The little fund secure, Ah, then all things are theirs,— Sugar fancies and other sweetmeats rare, Some pictures gay, also a hobby horse, Likewise a drum and violin; And this heart is insatiable! It opens up its eyes extremely wide .--But when at last for one of all these fancies The fund is lightly bartered, Then-good-by ye golden wishes all, Ye proud hopes and desires; In but one ginger cooky Ye terminated. Might as well run home.

land-by virtue of which we instantly distinguish and differentiate Shakespeare, even at his most artificial, from the ruck of the Elizabe thans. Being a 'prentice in London,

he tries often enough to be artificial; but Nature, as he knew her early between Avon and the hanging lands, tamen usque recurret: But there's a Tree, of many, one. A single Field which I have looked upon, Both of them speak of something

One may observe of persons bred in the country or by the sea and nurtured in out-of-door activities an inveterate habit—no matter how long the city has claimed them—of going, on rising from bed, straight to the window to observe where the wind sets and what the weather is likely to be. . . . Even so Shakespeare draws upon country life for a word, a comparison, an image, as easily, as naturally, as he would kiss his child. "Pavement critics" as we may call them, who do not understand this, will never understand Shakespeare; even as, if not English by race, they must wonder in vain how it came to pass that he, the successful London playwright, should yearn back for a competent old age in his native Stratford. Goldsmith. an Irishman, understood it-

I still had hopes, for pride attends us still, Amidst the swains to show my book-Amidst the swains to show his book learned skill.

Around my fire an evening group to the Yellow Sea beyond.

Our first stop was at Weihaiwei, before the dawn, and only twinkling lights, and dim outlines of hills against a velvet sky repaid us for hutungs, and to live again in a small charming Chinese house! More

"Set descriptions (of 'natural scen-

ery') may be manufactured to order, and it does not follow that even the most accurate or successful of them was really the result of a thorough and habitual knowledge of the object. A man who knows little of Nature may write one excellent delineation, as a poor man may have one bright guines. ... What truly indicates excellent knowledge is the habit of constant, sudden, and almost unconscious allusion, which implies familiarity, for it can arise from that alone—and this very species of incidental, casual and perpetual reference to the mighty world of eye and ear' is the particular characteristic of Shakespeare."—"Q." and "B. W." in Introduction (The New Shakespeare."

-Goethe. Translated by E. M. Cordsen, To Peking

The "Great Heat" now was gone and just when Pierre and I were talking of a trip up north, a letter fields and little farms where yellow came from Peking from our little corn was drying on the mud-baked Chinese friend, Miss Ling. She had roofs. Out in the melon fields were been married during the time that tents of grass, where tollers of the we were in America and now was soil would sit and guard their crops settled in her new Chinese home, throughout the day and night. . .. where she wanted us to visit her, away to unseen distances, where and so we forthwith planned to go. often trees bent low along their

Miss Ling had shown us much of China in our previous visit here, and we felt certain that no other guide passed through these waters watchwe lest certain that no other guide passed through these waters watch could possibly interpret to us, quite ing change creep slowly on. In foras she could, all the things we mer days there was no rice grown wished to see. Her husband, like here, and steamers laden with it herself, she wrote, was educated in from the south bore it as tribute to.

America, held a position in the Chinese Government and felt at home with foreigners. "He too will been carried on by the Conservance." welcome you," the letter read, and Board. CHAPTER I SUCH a question, Father! Do since start der why?" you to ask me to decide?" Pen-

on the arm of the big old-fashioned that had stood as long as she could remember by the west window in the library. Every evening after dinner, they sat together in the twilight—a time recognized by Judge Wiseman as belonging to his daughter. When she was a tiny girl, he used to tell her stories before her mother came to take her away to bed. As she grew older, they would talk over the events of the day. Whatever other arrangements it was nec-essary to make for the evening, he always tried to keep free this spe-cial time, claimed by his daughter as

Perhaps there would not have existed between father and daughter so close a tie nor so great a dependence on each other for happiness had dolls and to have tea parties out unthere been more members of the family. Sometimes, when the days were long, it seemed to Penelope that for a hundred years she had lived in the big, white house with only her father Margaret, the faithful, elderly and I used to bake potatoes and roast wienies and sometimes you would maid. And now she felt very old. was a freshman in East High come home early and have lunch and her father wanted to talk about sending her away to school. more. If you like I will have a large brick one made. Then surely you and

The Judge's Question 'If you had a little girl and longed to keep her a little girl, and every-one seemed suddenly trying to make her grow old, what would you do, Penny dear?"

Judge Wiseman asked this in much the same manner he might have used had he been speaking to an older

ine that the young girl cuddled in his arms would delight in a new doll. "I had thought of a school where she will have only young girls for friends and good women to mother Penelope other than as a child. To his intimate friends she had the same So grave was his tone that his larly young. Was it due to the short, blonde hair that curled about her

daughter, who had settled herself airily on the arm of his chair, took possession of his knee before reply-What have I done that makes you

want to send me away?"
"It wasn't much of anything, only I did not realize you were growing up until—well, until I passed you up until—well, until I passed you coming down the street this after-noon with those boys and girls lashes. To look into them was to

"And what?" transparent windows. Her eyes never wavered when she talked with "And then, later, when I saw you down in the garden with Dick West-

mouth."

"You were both so absorbed in talking that when I called, neither of you heard me. It startled me, Penny with a new doll.

"Better not buy the French doll for me, Dad. Everyone would laugh and tease me just as they did when wise, for you always used to be watching for me to come home." The queer little nickname that he had given her long ago slipped out unconsciously. When the mother had called the baby "Penelope," after her own sister, he had said: "She is such a wise-looking baby that my snecial name for her shall be "Penny un and Ruth's mother told her she would be glad when she was older.

"You dear old Dad!" The girl spoke quickly. "I'd rather be with you than anyone else in the world. You know Judge Wiseman ignored the last

Music of Old England By FANNY BUCHANAN

just as it has its own language, its cities, its great buildings. Few of us man visit all these different countries and come to know their places of interest; few of us may know the language of many different countries. But with the music it is different. We may wonderfully easily hear and come to know the music of almost every country. Phonograph and player piano are arrying foreign music into every home; even the strange music of China, faithfully pressed into the little black disk, is carried around the world.

"Music of Many Lands" is just a little introduction to some of the music which girls and boys in many lands love to hear. Now, an introduction is-just an introduction. We come really to know people, places, languages, by association. So you must hear often the music to which you are introduced through your music corner. At the end of a year, you will find that you have made music friends that you will always keep. And, too, you may feel that you have become acquainted with girls and boys of many lands, through the music which they love. HINK of three words which

describe some general characteristic of the people of Eng- Edward Elgar, has made gree, describe each of these three English favorites?

"Nancy Lee"

With the rolling sea surrounding England, with English men sailing English boats wherever boats can sail, of course England will have sailor songs. "Nancy Lee" is a song of the sailor of half-a-hundred years ago, the brawny sailor who climbed masts and set sail in the face of lashing tempests. Times and ships have changed, but the sea is the same. While the great ocean liner of today rolls on the same mighty waves, the modern natty sailor likes to whistle the old chorus as he presses the electric button which now acts in place of the old-time rigging.

Some of the words of "Nancy Lee" may not be quite plain to a lands-Costume for Girls' Teams call used, as boys today call "Whoo, whoo!" "Trow" is a term of assur-IRLS, here is a simple and ance, as a sailor today would say

effective way of putting your athletic team into uniform so that you will all look alike and yet be different from your oppo-"Sure. and yet by different from your opponents. The costume consists of a sleeveless jacket, worn over your middy, and a band of the same color around your head.

See there she stands and waves her hand upon the quay.

An' every day when I'm away she'll watch for me.

An' whisper low when tempests blow, for Jack at sea.

Yeo ho, lads, ho, yeo ho!

Take an ordinary lining pattern or Adams, the man who set this one cut from your middy, making the poem to music, spent many of his sleeve holes large under the arms boyhood days about the wharves of and the length about two inches Liverpool. He knew the sailors; shorter than your middy. Sew it to he heard them sing and whistle slip over your head, but cut the their sea songs; he heard their yarns. middy collar and tie. The neck and with them to be able so well to put arm holes should be turned in or the roll of the ship into music. But he must have had a real sail

"Flamborough Swords" Out of the dim past of ancient are quickly made, and if all are cut England have come many games out by some girl who has a knack which are played to music at patterns each team member can tunes and the movements are so rollicking that these old English musi-

Every country has its own music, | man, Cecil J. Sharp, made a careful study of these games. In his books may be found the history, the meaning, the description of, and the in-

structions for these dances.

The Flamborough is one of the most spectacular. It is performed by eight dancers. Each carries a sword, usually a long wooden one, and these swords are used in all of the figures of the rapidly-moving dance. The most thrilling moment is when the dancers, at a rapid skip-step, close in a small circle, from which they open in a line with the captain holding aloft the eight swords, locked in a circular figure.

This dance which is generally performed by men and boys, requires much practice. In some fishing villages it is part of the Christmas estivitles and is performed by carefully trained fishermen. Aside from the interest of the dance, the music is well worth hearing for its own sake. This is why it has lived so long, for once heard, it is not easily forgotten.

"Pomp and Circumstance" When a president is inaugurated,

or a king is crowned, there is need of music for a festival march. This music must be grand and formal, yet happy. The English 'composer, Sir land. Then, in listening to with just enough joyous dignity to English music, notice whether the fit such occasions, and named it three words could be used to describe "Pomp and Circumstance." It was its general character. What three words could be used to, in some de-The music opens with all the

Study Projects for Monitor Readers

Has the time come for the recognition of Russia by the United States, in view of the fact that the Soviet Government is to participa te in the approaching preliminary discussion on disarmament?

Should payment of its just debts, or at least an acknowledgment of them, and an expression of willingness to try to meet them, precede recognition? Has Russia had a sound reason for the non-payment of its debts?

Is there any evidence that the Soviet Government is responsi-ble for the revolutionary propaganda in China, India, and other parts of the world?
(See Monitor of Dec. 8, 18, 19, 21, and June 20, Aug. 3, Nov. 12, 13.)

Could co-operative marketing, strictly organized, overcome the natural economic law of supply and demand?

In what way would a national co-operative marketing bureau mable the American farmer to find a profitable market for his surplus crops?

Why is there a growing tendency toward the formation of an agrarian party in American politics and how has it recently been

What would be the danger of monopolistic control in a strong organization of the producers of the Nation's staple crops' How do you explain the connection between co-operative marketing and the British control of the world's rubber production?
(See Monitor of Dec. 12, 14, 21, 23, 24, 26, 30, and 31.)

Two questions, based on matters of public interest recently printed in The Christian Science Monitor, are put regularly in the above form on the Thursday Educational Page. The purpose of these questions is: To assist in a more thoughtful reading of the Monitor—on the part of all its readers. To present questions adapted to use as the basis of discussion or debate in secondary schools and colleges; frequently one for the upper elementary schools.

STOCK MARKET PRICES FOLLOW UPWARD COURSE

Motor Issues Are Prominent in Trading-Some New Highs

NEW YORK, Jan. 7 (49) Stock prices moved upward today on a sub-sidence of recent selling pressure and a resumption of pool operations on a

broad scale.

Call money was again in plentiful supply, the stock exchange official rate ruling around 4 per cent, but outside ruling around 4 per cent, but outside funds being available as low as 3½ funds being available as low as 3½ funds prices, and expectation of a formal announcement of the Barnsdall-Waite. Phillips-Simms Merger early next week revived speculative interest in the oil shares.

shares.

Merger reports also stimulated activity in the rails. Special strength of the sugar shares was in anticipation of unusually heavy consumption of the product this year.

Equipments responded to reports of increasing railroad inquiries while rumors of new super-power projects and higher dividends formed the basis for much of the speculation in the public utilities.

for much of the speculation in the public utilities.

General Electric, Phoenix Hosiery, Westinghouse Air Brake, and U. S. Hoffman Machinery sold 3 to 4 points above yesterday's, final quotations in the early afternoon.

Pacific Coast Company, which recorded a sensational advance of 12 points in yesterday's late trading, fell back 7 points on realizing.

Foreign exchanges were steady, demand sterling opening unchanged at \$4.84%.

A broadening demand for railroad obligations again holstered up the bond obligations again holstered up the bond market in today's dealings. Official announcements of record-breaking freight traffic for 1925, and favorable preliminary estimates of December earnings directed attention to the satisfactory position of the carriers, and stimulated a renewed inquiry for popular bonds.

ATCHISON'S BIG 1926 HUDGET

CHICAGO, Jan. 7—The 1928 budget of Atchison will call for expenditure of about \$80,000 000, according to President W. B. Storey. "While our budget has not been completed," he said, "we shall spend about \$10,000,000 for equipment and about \$70,000,000 for all material and supplies, including rails, fuel, etc., for both operating needs and improvements. It is unlikely that we shall undertake any financing during the year." ATCHISON'S BIG 1926 RUDGET

NEW YORK, Jan. 7 (AP)—The annual subscription offer of common stock of the United States Steel Corporation to employees is expected to be announced shortly, the amount being about the same as last year, 100,000 shares, which at that time was priced at \$125 a share. The price of this year's subscription has not yet been decided upon, but it usually approximates the market price on the New York Stock Exchange on the day of the offering.

THE NEW SPUTZ EIGHT
INDIANAPOLIS, Jan. 7—The new
Sutz vertical eight will sell at \$2995 for
all models. Six body styles are offered.
Features are eight-cylinder motor with
features are eight-cylinder motor with
worm drive axle and Timken hydraulic
brakes. It is built very close to the
ground, height of closed cars being 76
inches from ground to roof of car. The
wheel base is 131 inches.

AMERICAN METAL COMPANY

It is too early to state definitely just wast 1925 meant to American Metal Company in profits. It was a good year, however. The last three months of the period held to the earnings pace of the first three quarters, when \$4.68 a share was earned on the 539,015 shares of common after all charges including depletion. AMERICAN METAL COMPANY

NEW YORK, Jan. 7—Industrial Rayon
Corporation has completed the best year
in its history. Production of rayon was
2.000,000 pounds, not including any output from enlarged capacity of the Cleveland plant. Additions to this plant will
increase output in 1926, to 2,500,000
pounds, and it is expected earnings this

SALES IN 1925 BREAK RECORD

Volume Is Said to Exceed \$100,000,000-Profits Near \$50 Share on Common

One of the big money makers in the motor industry during 1925 was Nash. Motors Company. This concern has always made above-average profits whenever the automobile industry was prosperous, and last year it broke all records for both volume of sales and earnings.

whenever the automobile industry prosperous, and last year it broke all records for both volume of sales and earnings.

It is understood that sales volume if or his fiscal year ended Nov. 30 exceeded \$100,000,000 for the first time on shipments of around 90,000 cars.

These figures do not include sales of the subsidiary. Ajax Motor Company, which went into production around the middle of last year, and around the middle of last year, and around the middle of last year, and around the first six months of its activities has reached an output of 11,000 cars. Nash's sales in the fiscal 1924 year.

Strong Cash Position

Earnings for the last fiscal year are estimated at around \$14,500,000, equal to between \$45 and \$50 a share on 273,000 common shares, after preferred dividends. This would compare with net of \$9,280,000, or just under \$30 a share of common, in each of the company's previous record years, 1923 and 1924.

The large earnings, together with the fact that Nash common received only \$16 a share in dividends, a smaller percentage of earnings than that distributed by other leading motor companies, will be reflected in an unusually strong financial position at the end of the year.

Although the company made extraordinary disbursement of cash close to \$10,000,000 during the year, on account of its investment in Ajax, for plant expansion, and for purchase of the preferred stock in the market, it is understood that the cash position on Nov. 30 was several million dolars better than on Nov. 30, 1924, when holdings of cash and Government securities were \$27,319,970, equal to more than half of the total assets of \$45,742,600 as of that date.

May Split Common

May Split Common May Spilt Common

Nash has ealled for retirement its entire outstanding preferred issue as of Feb. 1, 1926, which will leave the common the sole outstanding capital liability. Calling the preferred indicates that a split-up of the common shares is in prospect, which will place this issue within the reach of the average investor.

shares is in prospect, which will make this issue within the reach of the average investor.

Expansion of the plants which has been undertaken during the last year indicates that the management expects larger business.

December sales held well above the records of the year and were 50 to 60 records of the year and were 50 to 60 records of the year and were 50 to 60 records of the year and were 50 to 60 records of the year and were 50 to 60 records of the year and were 50 to 60 records of the year and were 50 to 60 records of the year and were 50 to 60 records of the year and were 50 to 60 records of the parent of the company has invested about \$3,000,000.

Although operating only six months, it has already shown a fair profit. Its profits, however, are not included in the report of the parent company, and will be apparent only as the subsidiary pays dividends on stock held by Nash Motors.

Facilities at the Ajax plant are being expanded to provide capacity of 200 cars a day or 50,000 a year. It should be ready to operate at this rate by next spring; current output approximates half this total.

WHEAT PRICES AVERAGE LOWER, BUT CORN FIRM

CHICAGO, Jan. 7 (P)—With trade light, and with European markets unresponsive to yesterday's advance; wheat averaged lower in price here today during the early dealings. Reports were circulated that the crop in

ports were circulated that the crop in northern Argentina has not been the complete failure which it had been inside out to be, and that the crop in South Argentina is turning out weil.

Below \$1.80 for May, however, demand for wheat tended to broaden somewhat. The opening, which ranged from \$6 %c down, new style. May 1.80 % 1.80 % and July 1.54% \$2.155, was followed by numerous fluctuations within limits of about 1 %c.

Scantiness of country offerings to service gave firmness to the corn market. After opening % to %c higher, May \$7 % \$2.87 %c, corn scored moderate further gains.

Outs were steadled by corn strength. Starting at a shade to % to %c higher, May 45% \$2.460 to 46c, oats held near to initial figures.

Provisions had an upward trend, in line with corn and hogs.

RECORD FREIGHT

WASHINGTON, Jan. 7—The greatest traffic on record, measured by the number of cars loaded with revenue freight, was handled during 1925, according to complete reports for the year affection.

Loading of revenue freight for the year amounted to 51.177,962 cars. This was an increase of 2,643,529 cars, or 5.4 per cent, over 1924, and 1,365,849 cars, or 2.7 per cent, over 1923. It also was an increase of 6,059,490 cars, or 13.4 per cent over 1920, while it was a fill greater increase over 1821 and 1922. KANSAS CITY RAILWAYS CO.

CHICAGO, Jan. 7-P. C. Groner, acting for reorganization commission of Kansas City Railways first mortgage bond and notcholders, bid \$8,000,000 for the proport at the foreclosure sale. If confirmed, erty at the foreclosure sale if confirmed, etc. and the sale will wipe out all interest in the company of J. Ogden Armour and other stockholders.

MONTGOMERY WARD HAS SALES RECORD

Montgomery Ward & Co.'s sales for December 1925 were \$22.789,009, compared with \$20,445,196 for December 1924, an increase of 13.12 per cent. Sales for December were the largest of any month in the history of the company, exceeding October 1925 which was the previous high mark by \$524.127.

\$824,127.
Sales for the year 1925 were \$181,
095,989, compared with \$162,715 494 for
the year 1924, an increase of \$21,380,
1935 or 13.14 per cent. The sales of this
company for 1922 were \$92,474,182, so
that within a period of three years
the sales volume has approximately
doubled.

FORECAST FOR FIRST HALF OF THE NEW YEAR

OXYGEN PLANT CONTRACT OXYGEN PLANT CONTRACT
NEWARK, N. J., Jan. 7—A. A. Heller,
treasurer and general manager of international Oxygen Company of Newark,
cabled that he had negotiated a contract
with the Soviet Government of Russia
for construction of oxygen plants in
that country. Mr. Heller had been in
Russia since October. Company officials
said the entire matter was in Mr. Heller's
hands.

CHICAGO GROWING AS CLOTH MARKET

Attracting Greater Number of Merchants Yearly

Cleveland Banker Predicts
Good Volume of
Business

In a forecast of 1926 business J. A.
House, president of the Guardian
Trust Company of Cleveland, says
Today we face 1926 with a belief
that the first half of the new year
will witness a steady, substantial volume of business.
We have just come through a year
of good stable business as evidenced
by the record haulage of raw and finshed products by our railroads, and
by the large total sales of farm products, other commodities, and many
luxuries.
All indications presage a consistent
demand for raw products and finished
commodities in almost every line during the first half of 1926. It is likely
that a peale will be reached some time
after June, and this, on the basis of
commodities in almost every line during the first half of 1926. It is likely
that a peale will be reached some time
after June, and this, on the basis of
past experience, will normally be followed by a moderate recession.
On the basis of credit conditions
the country as a whole is in good
condition. Savings deposits are the
highest in the history of the country,
and the commercial deposits stand
at the highest average.

Credit is abundant. With a tendency toward steady volume of good
business in 1926, banks and other
formercial creativations to the formercial creativations to the contants of the formercial creativations and other

NOT TO SELL MARKET STREET RAILWAY

SAN FRANCISCO, Jan. 7—Samuel Kahn, new executive head of Market Street Railway, now under H. M. Byllesby & Co.'s control, through United Railway Investment Company and for subsidiary, California Railway & Power Corporation, says it is the Byllesby pupose to continue to operate lines in accordance with best publicutility practice and also to continue their development.

"We are entertaining no plan nor are we contemplating any step toward attempted sale of the properties to the city," he says.

Every employee of the Nash Motors Company and the Seaman Body Corporation and the Seaman Body By ALBERT F. GILMORE

of Massachusetts to prepare and publish an authoritative work on the Birds of Massachusetts and New England. The preparation and production of such a work is truly a great enterprise. The collection of the material for so comprehensive a work of wearing recording such appendix

leaving to two subsequent volumes consideration of song and inland are not to go the way of the passen game birds. The first volume, as will ger pigeon and the heath hen. the others, bears the name as author work is first hand. He has also en- timely end.

winter residents, and the travelers which pass through during the seasons of migration, but it also contains most interesting accounts of the occasional and rare visitors, of some of which perhaps there is but a single record of their appearance in the territory under consideration. Several southern varieties, which, driven before the tropical storms which occasionally sweep this coast, touch the shore of Cape Cod, are included in the list, so that the volumes constitute a treatise on bird life which is much more comprehensive in its scope than any other.

Several southern varieties, which, driven before the tropical storms which occasionally sweep this coast, touch the shore of Cape Cod, are included in the list, so that the volumes constitute a treatise on bird life which is much more comprehensive in its scope than any other. hensive in its scope than any other work on New England birds. Some years ago Mr. Forbush inaugurated the plan of issuing bulletins containing information, gathered from a wide area along the Atlantic coast, relative to the habit of the bird denizens of that territory, including their food, movements, behavior in storms, and many other interesting

Mr. Forbush has also taken a keen interest in bird-banding, a practice only recently undertaken, and now widely adopted by bird students. Much of the information thus gathered, duly classified and arranged, Much of the information thus gathered, duly classified and arranged, appears in these pages adding a new and immensely interesting feature. Prior to the adoption of the custom of bird-banding, the movements of bird-banding, the movements of birds were for the most part conjectural, except to the general direction of their migration routes. Now much tural, except to the general direction of their migration routes. Now much reliable information is at hand, a when young were banded at Barn-stable, and in the course of two years were reported from as wideseparated points as Jamaica, Key West, Louisiana, central Pennsylvania, Maine and central Canada.

In accordance with the Act of the General Court providing for the preparation and production of this work, much attention is given to the economic value of the different work, much attention is given to the economic value of the different varieties of birds, their uses and relation to markind. A notable feature in connection with the biography of each species is the study of its haunts and habits. Here the literary skill of the author finds expression and many of the paragraphs are delightful reading. The descriptions of the plumage are compression and the state of the study of the plumage are compression and the state of the study of the plumage are compression and the state of the study of the plumage are compression and the state of the study for seasonal work find winter employment. Shipping men believe that the mere fact that more persons are traveling by water is an asset to the American merchant marine and that those who travel south by water in tions of the plumage are compre-hensive, dealing with the most hensive, dealing with the most minute detail of this subject. A feanot found in other works of

tration in these interesting pages. An instance of this is found in the discussion of that mooted question whether a loon uses its wings propelling itself under water in traveldistances, while submerged, etimes of several hundred yards. Such eminent authorities as Dr. T. S. Palmer, secretary of the A. O. U.;
Dr. Ellicot Coues, an accepted authority of his day; C. William Beebe,
F. # Allen and other notables disthe question in the light of thefr wide experiences.

chapter on gulls and wild ducks contains much information which cannot fail to delight the lover of these beautiful ornaments of our rivers, lakes and shores.
The illustrations are a notable fea-

of this volume. Thirty plates in color from drawings by Louis gassiz Fuertes, America's best known bird artist, add a distinct charm to the pages. That the drawings are true to life is assured by the reputation of the artist; while the color work is as near perfect as human eye can conceive. There are, besides, a goodly number of excellent pictures in black and white, reproductions of photographs taken from life. Nothing is wanting in the artistic excellence of the illustra-tions. No better proof of the great

STUDENTS of bird life, an everincreasing army, can scarcely
fail to applaud the enterprise
which has prompted the Department
of Agriculture of the Commonwealth
of Messachusetts to prepare and pub-

terial for so comprehensive a work of warning regarding such splendid on ornithology in itself involves a tremendous amount of labor of common enough in New England pasthe most painstaking order. In this respect, Massachusetts follows the lead of New York which, at great expense in 1843 authorized a comprehensive book on the birds of New York, and again in 1909 published a mammoth work in two volumes on the bird life of that State. Those volumes on the bird life of that State. Those volumes on the bird life of that State. Those volumes on the bird life of that State. Those volumes the proper with so the proper with the proper with so the proper with the p the bird life of that State. Those volumes, however, were not placed on sale, but distributed through the officials of the State, a fact greatly to be regretted. Nothwithstanding that, although it is the most valuable work although it is the most valuable work.

on the birds of New York that has ever been compiled, it can now be purchased only through the dealer in secondhand books. Massachusetts wisely offers the volume for sale at a comparatively low price.

Part 1 of the work which has recomparatively low price.

Part I of the work which has recently appeared deals with "water birds, marsh birds and shore birds," prompt and united action, if these characteristic birds of lake and shore

No country in all the world has of Edward Howe Forbush, State ornithologist, one of the best known with bird life, both in variety and in authorities on birds in the United States, especially on their economic as in the case of many of our natural

PATENT ATTORNEYS

PATENT-SENSE As one of the oldest patent firms in America we give inventors at lowest consistent charge a service noted for results, evidenced by many well-known patents of extraordinary value book, Patent Sense, free. LACEY & LACEY, 638 F St., Washington, D. C. Established 1869.

States, especially on their economic value to mankind. For many years Mr. Forbush has been a careful observer of birds in the open, so that much information contained in this work is first hand. He has also entimely a first hand. He has also entimely a first hand. He has also entimely end. work is first hand. He has also enlisted the services of a large number of skilled field observers, making of the work a compendium of intimate immediate necessity of more stringular excellent work. Its merit entitles it information of the birds of New England.

The work deals not alone with the familiar varieties, both summer and the familiar varieties, but a long the birds of New England bird life.

In the Ship Lanes

and.
The principal orders were those for the combined passenger and freight ships for coastwise and intercoastal ships for coastwise and intercoastwise service. Among these were six ships for the Clyde Line, three for the Merchants & Miners, one each for the Old Dominion, the Porto Rico Line, the Eastern Steamship and the Matson Line. The last is one of the largest ships to be built in American yards and is expected to be the most palatial work of an American company. The items. This information properly work of an American company. The summarized and in excellent literary style, now appears in this work.

and is expected to be the most paradactive work of an American company. The cost exceeds \$6,000,000 and when completed the ship is to be used in the Hawaiian service from San Francisco.

New Ships Ordered Another large order recently placed called for a 600-foot steamship for the International Mercantile Marine, the vessel to be of 22,000 tons gross, and

reliable information is at hand, a fact which lends a new impetus to hind study. A real and single fact which lends a new impetus to be single fact which bird study. A well arranged map 340 ships, of 190,000 gross tons, a gain shows the surprisingly wide area of 31 per cent in tonnage, as com-over which black-crowned herons pared with tonnage of 1924, while traveled in two years. The birds ships under construction total 35 per cent more tonnage than was the case a year ago. The major portion of the shipbuilding was of steam-driven craft, motorships comprising only 3 per cent of the tonnage. Likewise, yards on the Atlantic Coast exceeded the combined work done by those on the Pacific, the Great Lakes and on western rivers.

Southern Services Increase those who travel south by water in the winter may be expected to use water routes more extensively in the summer than formerly.

ture not found in other works of this character are the paragraphs on moulting, which give the time when the different species change their costumes and the variations in the colors which ensue.

There are also many excellent field notes which assist the student in identifying the species in the open. How fascinating the study of bird life may be finds excellent illustration in these interesting pages.

From Miami the steamship Mun-From Miami the steamship Mun-eastern of the Munson Line is mak-ing semiweekly trips to Nassau and after Feb. 1 will make tri-weekly trips, the ship being larger than those for-merly employed in this service. From the north, the various lines to all Florida points are too numerous to

Panama Canal Traffic

The reports for the two final months of the calendar year indicate that the tonnage through the Panama Canal will show a favorable comparison with former years. Merchandise cargoes west bound are increasing, the decreases reported in former months being largely the off business east-bound. During November, however, this business showed some increase and the large number of tankers going west in ballast forecasts a heavy east-bound movement of oil during the ensuing weeks.

that he did not want it to develop along the lines of party politics. He hoped that the Settlement would be a sign of active citizenship and that they would apply the spirit of Christianity to their everyday endeavor.

Lady Astor who, ever since she started the little Victory Club, has held before her the present achievement, said that it was like a dream come true. She had often felt how hard it was, when the club was full

bound movement of oil during the ensuing weeks.

Continued discussion of the desirability of placing the regular Canal lines under jurisdiction of the Interstate Commerce Commission as to rates continues. The National Association of Railroad & Public Utility Commissioners of all the states approved this in its convention. The Chamber of Commerce of the United States disapproves. Railroads, and many shippers of freight urge it, while merchants located nearer to the coast oppose it. The attitude in general is based upon the individual's own business needs.

Mami Attracts New Sames

will alternate with the Lurline in giving Seattle and Puget Sound ports a bi-weekly sailing to Hawaii. The Lurline's schedule calls for departures from Seattle Jan. 16, Feb. 27 and

Transatlantic Service Decreasing During the next two months, the principal transatiantic lines will reduce the number of sailings as their duce the number of sallings as their principal ships either go on cruises or are given their annual overhaulings. The Leviathan, of the United States lines, is to make her last round trip, and upon her return to New York the latter part of the month will be laid up until March 20.

The Aquitania of the Cunard Line has not been in port for several weeks.

has not been in port for several weeks and the Berengaria will shortly tie up for a few weeks. The Olympic of the White Star Line likewise has not been arriving at New York on her regular tri-weekly schedule. By the middle of March, all the large ships will be ready for the transatlantic service again. Liner Movements

F. S. LORD ASTOR OPENS BRITISH INSTITUTE

Virginia House, 'Plymouth, to Work for Uplift Purposes

Special from Monitor Bureau LONDON, Dec. 26-Virginia House, Plymouth, the first institution to be opened in the West of England on the lines of Toynbee Hall-the well known social institute founded for the burpose of helping and uplifting the poorer classes in London—owes its inception to the efforts of Lord and Lady Astor. The inauguration ceremony took place recently, when the new buildings were opened. These have been adapted from two older buildings, the Victory Club, started in 1914, and an old disused chapel, both of which have been reconditioned and redecorated.

Lord Astor made it clear to his audience that although he and Lady Astor had been able to provide the buildings, it rested with the people themselves as to what the soul of the structure should become. One thing of which he was certain was that he did not want it to develop

Lady Astor who, ever since she Exhibition will be "not less than started the little Victory Club, has £1,581,905 2s. 1d" an appeal has ment, said that it was like a dream the National Union of Manufacturers come true. She had often felt how that in view of the undoubted benefi hard it was, when the club was full of the exhibition to British industry to overficwing to have to say "No" to the guarantors should be relieved by the children who said "Can I come the Treasury of their liability—in in, Miss." Politics, she declared, had other words, that the British taxnever had a footing in the Victory payer should bear the burden. The Club, and they would never set foot amount represents 15s. in the pound. in Virginia House.

Next Week Beginning Monday, January 11th,

the Annual January Sale of Linens takes the stage as the store's leading attraction.

This is one of the big, outstanding sales of the year and offers ex-ceptional opportunities for supply-ing the household needs—sheets, pillowcases, bedspreads, to wels, wash cloths, crashes, etc.—at the lowest prices. It is a good time to

anticipate your needs for months SIBLEY, LINDSAY & CURR COMPANY

EDITORIALS

Mr. Bernard M. Baruch, who was chairman of the War Industries Board at Washington during the World War.

To Prevent War; Not Profits Only

contributes to the current Atlantic Monthly an article on "Taking the Profit Out of War." Mr. Baruch says that his interest in the topic was stimulated by an article by Sisley Huddleston,

Paris correspondent of The Christian Science Monitor, in the same magazine, entitled "An American Peace Plan." Mr. Huddleston's article was based upon the plan for the general conscription of man-power and of wealth, so far as might be necessary for the purpose of prosecuting a war, which has been urged by the American Legion, The Christian Science Monitor and other forces of public opinion.

It is quite apparent that Mr. Baruch's plan differs materially from that which the Monitor has urged. As a stroke at the profiteers, as a device for making a more efficient and less costly organization of industry in war time, it possesses obvious and notable value. We could wish, however, that its author had gone a little more explicitly into its merits as a deterrent to war. On this subject he says:

The application of this plan, besides making the Nation a coherent unit in time of war, would impress upon every class in society a sense of its own responsibility in such event. If it were known that this universal responsibility would be enforced, no class—social, financial, or industrial—could fail to understand that, in case of war, it would have to bear its fair share of the burdens involved. and would have to make sacrifices of profit, convenience and personal liberty correlatively with those made by the soldiers in the field. To this extent the plan would act as a positive deterrent to any hasty recourse to force in an international controversy.

One thing that has definitely come from the war is the necessity of arranging affairs so that a portion of the population shall not be sent to the front to bear all the physical hardships and their consequences while others are left behind to profit by their absence. If applied at the outbreak, the War Industries Board (as it was functioning at the close of the World War) would prevent this, and lessen, if not remove, the social and economic evils that come as the aftermath of war.

To our mind the essence of any plan to discourage war by equalizing its burden lies in the literal enforcement of the clause, "no classsocial, financial, or industrial-could fail to understand that, in case of war, it would have to bear its fair share of the burdens involved, and would have to make sacrifices of profit, convenience, and personal liberty correlatively with those made by the soldiers in the field."

Whether complete equalization of sacrifice can ever be attained is more than doubtful. No sacrifice is greater than that of life, and no possible discomfort or inconvenience in civil life is likely to equal the sufferings in the trenches, or on the battle field.

Mr. Baruch says that the conscription of wealth is "prohibited by our Constitution, contrary to the spirit of our social and political institutions, and impossible in practice." But as long as it is possible to take a youth from school and home, teach him to kill and send him to slow death on barbed wire or in a crumbled dugout, nothing should be impossible in the way of a levy upon the material possessions of other men. If the latter is "contrary to the spirit of our social and political institutions," what in the name of humanity is the former? And since it is unconstitutional now to take private property for public use without payment, some such constitutional amendment as has been urged by both great political parties should be adopted in order that the dollar should not be vested with a higher sanctity than the man.

Of course the thought of conscripting labor is repugnant to Labor. Undoubtedly the conscription of capital is unpleasing to capitalists. If a declaration of war means inevitably that both will be put into effect, neither Labor nor Capital will be eager to have war come. Time was that only small professional armies fought the battles of the nations. Peoples as a whole went about their daily affairs little vexed or discommoded by the fact that, their nation was at war. The recent war engaged a great part of the able-bodied youth of the nations involved, and those who returned from service are firmly determined that war shall never

come again. It is to give effect to this determination that the American Legion has set up its demand for universal conscription—conscription of men for work as well as for fighting, and of such capital as may be necessary for the prosecution of the war. The veterans believe that if all faced the sacrifices they have met, or correlative ones, there would be more prolonged hesitancy about going into war. And they propose that the law shall be so drawn as to insure, so far as is humanly possible, this equality of sacrifice.

Mr. Baruch's plan is admirable as far as it goes. It has the merit of proceeding along lines already tested and found serviceable. It would, measurably, prevent profiteering, control prices, distribute available labor where it would be most needed. It would make the Nation a coherent whole in war-time. But it fails to meet the fundamental need if it is to act as a deterrent to war. It does not go far enough to establish that "universal responsibility," to create that equality of sacrifice which would impress on every individual the fact that in war he would be called upon to suffer-if not as much as the soldiers suffered in the Argonne or at the Marne, yet enough to make him hate the very name of war. Protection against rising prices, the overthrow of the profiteer, are both admirable ends to seek, but to make war hateful to all sorts and conditions of men is the end most necessary to attain.

It is not mere chance that the fact that San Francisco enjoyed its driest holiday season this last Christmas since prohibition became effective in America should have coincided with the decision of the State Attorney-General, that the Prohibition Party of California is a qualified party and entitled to a place on the ballot in the coming state primary election. Both facts pointed to the same conclusion—that the wets are fighting a losing battle. According to federal dry agents no drinking was discovered in any public gathering places in that city and not one arrest was made.

So closely related, in the thought of the people of the United States generally, and in the

thought of senators and representatives in Congress, are the problems presented by the tariff as a whole and the particular problems having to do with what is referred to as "the exportable farm surplus,"

Investigating the Tariff Board

that it may prove both advantageous and necessary to consider them collectively. In the United States Senate, a few days ago, two resolutions were offered, one by Senator King of Utah, a Democrat, and the other by Senator Smoot, of the same State, a Republican, proposing an investigation of the operation of the flexible tariff clauses of the act of 1922 and of the functions and activities of the United States Tariff Commission in administering the particular provisions of the law.

That the resolutions which promise to open the entire question of tariff schedules for consideration at the present session of Congress were offered by both a Democratic and a Republican senator indicates the determination of the opponents of the existing schedules to force the whole issue of revision at this time, and, as well, the apparent realization of the Administration leaders that the challenge must be accepted. It is true, of course, that while the Senate is the first to deal with the matter in this more or less indirect form, any proposed legislation affecting specific schedules must originate in the House of Representatives. But the problem which seems to be involved is much more important, economically, than one dealing with a few disputed schedules. For many months, in the western and far western states, even among Republicans, there has been serious discussion, if not actual discontent, respecting the alleged inequalities of the existing law. Spokesmen representing the great agricultural industry have iterated and reiterated the declaration that present schedules oppress rather than benefit the farmer. It is insisted, despite the fact that the President, under the authority of the flexible tariff provisions, has increased the duty on wheat to 42 cents a bushel, and upon wheat products to \$1.04 a hundred pounds without creating a market for wheat and its products, that there is a widespread dissatisfaction in the agricultural sections because of the claimed inability of the farmer to market his surplus crops except at prices below the point of remuneration for the

cost of production.

It is pointed out in support of the farmers' case that notwithstanding the low price of wheat, corn, and other grains, the farmer is obliged to pay unreasonably high prices for manufactured articles because of the "unreasonably high duties imposed by said tariff act upon manufactured articles, of which condition the Tariff Commission has made no ininvestigation and has recommended no measures of relief." The language quoted is

from the resolution offered by Senator King. Senator Smoot's resolution, which proposes an investigation during the present session of Congress by the Finance Committee of the United States Senate, and not by a special committee as urged by his colleague, deals less critically with the commission. Senator Smoot refrains from special or argumentative pleading, apparently contenting himself with a declared willingness to face an uncomfortable, if not an embarrassing situation. There is no indication that he assumes the fact to have been established that the Tariff Commission has not met the economic, emergency which it is insisted exists, or that it cannot, by a proper exercise of its functions, deal with it satisfac-

It seems inevitable, from present indications, that, whichever resolution the Senate may adopt, a full and thoroughgoing investigation of the operation of the so-called flexible tariff law will be made. But it remains to be seen whether the somewhat formidable opposition to the Administration theory as embraced in the present law, and as applied by the existing commission, will be placated by a mere investigation. The powerful interests represented by middle western legislators are already convinced that their economic welfare has not been considered. Their brief has already been pre-

Many an American boy, no matter how sedate and dignified, will watch with interest

Exploring the Land of the Mayas the departure from New Orleans, within the next few days, of the little expedition under the direction of Gregory Mason, explorer and writer, and Dr. Herbert J. Spinden, assistant curator of the Peabody

Museum of Harvard University, on a voyage of discovery into the land of the ancient Mayas along the coast of the peninsula of Yucatan. If our old friend the Walrus were to comment upon this proposed adventure he no doubt would revise his familiar observation regarding shoes, and ships, and sealing wax, and cabbages and kings, by adding to these the humble and sometimes illy regarded chewing gum of commerce. For it is stated that it is only because of the growth of the American chewing gum industry and the establishment of camps and trails by employees of the Chicle Development Company in the interior of the country that it has been made possible for explorers to undertake the study now proposed.

For many years the hostile Indian tribes of Yucatan have made it unsafe for persons of other countries to enter the closed territory which they have dominated for centuries. They have zealously guarded their ancient landmarks, the sites of destroyed cities, and the relics of what is known to have been an advanced civilization, against even the friendly emissaries from neighboring countries. Dr. Spinden is quoted as having expressed the conviction that important discoveries will be made as a result of the present expedition. He believes the ancient Mayas were a city-dwelling people and that Yucatan once had a dense population. Already there have been found indications that the ancient inhabitants had need is in process of being met thereby,

achieved beauty and strength in architecture, and that they had progressed far in painting and sculpture. Their hieroglyphic writings, some of which have been deciphered, disclose a knowledge of the natural sciences and are said to have recorded their triumphs along this

It is in that section of the peninsula which has been made available through scattered industrial development by American promoters that it is hoped to unearth the rarest of the Mayan treasures. Back of the rarely visited ruins of Tuloom, on a cliff overlooking the Caribbean Sea, are said to be ruins which have never been explored by scholars. At present it is intended to make only a superficial or preliminary survey of the territory. Maps and photographs of visible relics will be obtained, leaving extensive excavations for a future task.

Dr. Spinden enjoys an intimate knowledge of the locality surrounding the section which he now proposes to enter. He has already made fourteen expeditions into Central America. Only last month, as a result of continued study and research, it was announced at Harvard University that he had solved the mystery of the Venus Calendar of the Mayas. He is well equipped, apparently, to interpret any less abstruse secret of the lost tribe which may lie hidden under the dust of the ages.

Mistress Quickly, it may be recalled, on a certain occasion, when asking John Rugby to "go

Abusing

the King's

English

to the casement, and see if you can see my master, Master Doctor Caius, coming," gave it as her opinion that "If he do i" faith, and find any body, in the house, here will be an old abusing of . . .

the King's English.".

And the New York Times recently published an editorial on "The Dialect of London," in which the writer so skillfully instanced a number of examples of such an abusing that it became obvious that the individual needs no great incentive to cultivate the habit. "It was an American who first cried out against the dialect of London,' but the palm for invective has passed to an Irish dramatist, St. John Ervine of 'Jane Clegg' and 'John Ferguson,'" the article in question commences. And it goes on to assure its readers that "of 'educated Americans' Mr. Ervine says that they do 'speak more distinctly than educated English people.'

Be that as it may, and much more could be interestingly quoted from the article in the Times, there is but little doubt that this question of using or abusing the King's English is one which will arouse argument for many years to come. And it all hinges around personal likes and dislikes, around individual idiosyncrasies, around what is generally accepted in a locality, or at a particular period of time. After all, when everything is said and done, it surely does not make a great deal of fundamental difference whether a word be pronounced with a long "a" or a short one, whether extraordinary is pronounced "extrawdny," or whether some one has been guilty of asking the question, "Did you ever see a squr-rel eat a ver-ry prret-ty

And yet it is just such trifles that often serve as provocative causes for all sorts of discords. The dialect of one locality stirs the denizens of another to scorn and sarcasm, while the manner of speech of these latter gives rise to laughter and hints of lack of education, etc., from those who are their neighbors. Even the so-called "cockney" tongue of London, with its startling lack of h's where they should be, does not involve in the least degree an evidence of moral turpitude. After all, it is the spirit which counts, and the letter is literally to be discounted when it comes to its pronunciation or its accent. A little more charity in place of criticism, and a willingness to see the other fellow's side of the case would do much to put a stop to any real abusing of the King's, or the Queen's, or the President's English.

Editorial Notes

Fifty years in a newspaper composing room constitutes no mean record; and it is little wonder that Andrew B. Adair, who has just completed his half-century with the Chicago Daily News, should feel properly proud of that fact. He has given expression to his sentiments in a pamphlet addressed to his associates and fellow workers and issued simultaneously with a special sixty-four page anniversary number of the paper, with which he has thus been identified from its inception. For the first regular issue of the News was published on Jan. 2, 1876, and Mr. Adair was employed to "lay" the "dress" of type and to set the first type composed for the paper, the railroad time table. Here is a paragraph which shows the spirit which undoubtedly has animated him throughout his years of service:

One may wish no better good fortune for those who compose the Daily news chapel, and the chapels of the future, than was the good fortune of those who composed the chapels of the preceding fifty years. Throughout those years there has been no backward step in the advancement of better conditions of employment advancing wages. For these things we are indebted to the chapels of the early past. Should not we of the present so conduct ourselves that future chapels will accord us credit?

While nothing can excuse the prodigal waste of lumber in America during recent years, it is worthy of note that a new source of wood substitute has been discovered in the waving fields of sugar cane. Synthetic wood is being made, that is, from crushed cane stalks after the sugar has been extracted. This new industry is spreading from the center of the sugar country in Virginia over the valley of the Mississippi and it is reported that from one \$3,000,000 cane wood plant in that region more than 200,000,000 feet of wood substitute is being shipped out in a year. This potential source of "lumber" is known technically as bagasse, and it has been tried and found wanting in a number of other directions. It is a troublesome waste product and the attempt has been made to utilize it as fertilizer, live-stock food and fuel, but without success. Now it seems that not only has a use been found for it, but an exceedingly great

Blue Nets in Brittany

Brittany is famous for two species of fish: a very big and a very little one-the tunny and the sardine; but neither of them is confined especially to the seas that wash the Breton coast. Tunny indeed does not wittingly come within miles of a coast upon which he and his little friend, the safdine, land with such distressing frequency, but is dragged there at the end of a line by main force. The sardine, on the other hand, is caught, in a net, a beautiful blue silk net of the finest mesh, invisible in the water, but beautifully visible when hanging out to dry from the mast-heads of the brightly painted fishing

No one has a better eye for the picturesque than your simple Breton, which fact, by the way, should be sufficient to warn visitors that he is not always as simple as he looks, though few have the wisdom to take the hint, and the Breton generally gets the better of a bargain.
Concarneau, the headquarters of the tunny fishery and

an important port in the sardine fishery also, has an annual festival, known as the festival of "The Blue Nets." In some ways it resembles an old English May Day celebration. There is a procession headed by the Queen with her maids of honor, attendant cars gayly decorated, symbolic and so forth: and these events were ostensibly the object of our thirty-mile drive to Con

But to some of us it was more of an excuse than an objective, for, while quite glad to see the procession with the quaint costumes, and to pay due homage to the Queen of the Day we anticipated yet more eagerly the opportunity to see the famous tunny boats at home, and perhaps, if we were fortunate, to see a few of them setting forth or returning from the chase.

Some of that good fortune we had, as events proved, and the British members of the party returned home with a healthy realization that theirs was not the only maritime population in the world, and that there are no finer boatmen to be found than those who go down to some of the roughest seas of the world in the tunny ships.

We set out in a small motor char-a-bancs, somewhat the

worse for wear and weather. Rain was pelting down and the clouds showed no signs of breaking. Yet we started undaunted, though we had to pull up six times in the first five miles on account of water in the carburetor. Our driver, with the pertinacity of his race, however, soon hit upon a contrivance which kept the carburetor clean and the engine going for the rest of the journey and return.

We passed many interesting and picturesque little villages and towns on the way. However small the town or village it generally boasted a very large church, many of them gems of architecture.

Locronan. It is dedicated to St. Ronar, whom, thanks to Sir Walter, we always thought a Scot; and there is something un-French and not un-Scottish about this little town. The church especially, though very fine in its way, is curiously unlike all other churches in the neighborhood, having not the graceful, delicate spire of a lacelike tracery so typical of Brittany, but a tower of bold and broad design and unique brickwork, of a Gothiccum-Norman order.

After stopping for half an hour to view this beautiful building, we scorched and hooted upon our way until we reached Quimper, a provincial cathedral town and the best center from which to explore Brittany. The cathedral, very beautiful, three-spired, and smallish as cathedrals go, very much resembles that of Lichfield in England.

Quimper is also the proud possessor of a river, the Odet, with probably more bridges to the hundred yards than any other in the world, except possibly some in China. The business part of the town is on one bank, the residential part on the other, and nearly every private householder goes over her own bridge to do her own shopping. And so we rattled on past the hundred bridges on the last lap of our journey to Concarneau.

It is not easy to say which is the most interesting as regards Concarneau—its past, present or future. As in so many French towns, many relics of its past are still standing. A very live and active harbor is still frowned over by a fortress, of which not very much is left but the frown-left behind after the rest has disappeared, like the grin of the Cheshire Cat.

This castle must in olden times have been an impregnable obstacle to an invader from the sea, for to approach within sight of its walls is something of a feat makes a splendid man of him.

even in peace time, so tortuous is the channel. There are, of course, many guiding marks for navigators, most

of them easy to obliterate, were it necessary.

The inherent economy of the French is very much in evidence in some of these sea signposts. Where other nations might go to the expense of building a beacon or a lighthouse, the French make use of the existing towers in the shape of the rocks themselves, painted white and

sometimes with a beacon atop. The frowning castle speaks of the past of Concarneas; the thriving harbor of its present prosperity and a growing popularity, evidenced by an increasing population visitors and artists, hints at a future that will never

But the procession of the "Blue Nets" is seen winding its way down the hill from the "Mairie," and we must turn aside for a moment to notice it. It will be only for a few moments, for the procession is not long—nor, to speak truth, very impressive. There are two especially elaborate cars painted to represent the two great indus-

tries of the place—the tunny and the sardine.

There should be one representing the third industrythe artists, for art has quite a school of its own in Concarneau, corresponding in some ways to the Newlyn school in England, though probably it would scorn the comparison! The tunny car is shaped, molded, and painted to resemble that redoubtable fish, with a wonderful reproduction of his indignant eye-for the tunny, judging from his expression, never seems to have quite got over the surprise and indignity of being caught!

The Queen of the Blue Nets is enthroned high on another car, surrounded by her maids of honor, and indirectly by all Concarneau, visiting and visited! She is dressed in the most gorgeous and, as a matter of fact, east artistic of her native costumes. The simple, every day dress of a Bretonne is becoming and artistic, but the gala edition is inclined to over-elaboration and decoration

Many of these dresses are heirlooms, and each generation seems to have added its quota of trimming, till the dress has ceased to be a work of art and beauty, and become a work of craft and curiosity. But the procession is a short one and soon passes, winding its way up to and over the bridge to the castle; while we wend ours back to the quayside to examine the real wonder and glory of Concarneau—the tunny boats.

These vessels, famous and familiar to all those skilled in sea lore, are super fishing smacks, twenty to twenty-five feet in length "over all," by about ten-foot beam. Built of solid oak, and proclaiming in every line their immense efficiency and powers of endurance, they are of fairly shallow draught, though with nothing corky

and unstable about them.

They can hold close to the wind and close to the water. There is not a spar or a gadget aboard that has not got its work to do, and that is not doing it all the time. The tiller lashings are eloquent of a weather helm beyond the power of mere man to control. The boats are usually cutter rigged, sometimes ketch, and now and then yawl. Their hulls are painted a variety of bright colors—their sails every shade of red, and yellow, from the deepest brick dust to the golden sands.

On either side of the mast is lashed what looks like a huge fishing rod—and such indeed it is. Each ship has two or even more of such rods, and each rod has at least four lines, at the end of which are large hooks, baited with gigantic horsehair flies, which dance over the waves with the tunny in eager pursuit-afterward in helpless tow!

These rods are stepped to the foot of the mast on a hinge, and when they are lowered halfway preparatory to fishing present the appearance of huge antennæ; which caused the boats, when we saw them sailing out to sea, to resemble gigantic moths flying toward the sunset! On the return yoyage the antennæ are again folded and the body of the moth is laden, like that of the bee, with the spoils of the chase; hanging on a sort of gridiron, with which every boat is furnished.

Columns could be, and have been, written about the tunny, and the magnificent sailors who go in search of him, and it is perhaps sad to think that the material reward of the fishers is so much less than that of the agents to whom they sell the fish. But the tunny fisher has his unions and protective societies, which have been in existence for many years, and in the end doubtless he reaps a greater reward than he does at the beginning. for his trade "hard work" requires much courage and

The World's Great Capitals: The Week in Rome

The remarkable improvement in the relations between Italy and the United States, which followed the settlement of the Italian war debt to America, has led many here to believe that, as a special favor to Italy, the emigration restrictions would be revised in the near future and that a great number of Italian emigrants would be allowed to enter yearly the United States. Count Volpi, Italy's Finance Minister, has recently expressed his views on Italian emigration, and to the surprise of those who hoped for a change in the emigration policy of the United States he openly manifested his approval of the American restrictions on Italian emigrants. The truth is, said Count: Volpi, that Italy has no unemployed, and that there is work for everybody at home. If the United States should continue to attract large masses of Italian workers the result would be an increase in the cost of labor in Italy. Further, his recent visit to America had convinced him that Italian emigrants were gradually becoming important in the economic and industrial life of America, and were of much more value today than when driven by necessity they were obliged to accept any sort of occupation which offered itself. Count Volpi believes it to be inevitable that one day America will open her doors again to Italian emigration, but by that time Italy will be able to send better educated and more skilled workmen.

4 4 4 In the coming spring Venice will hold her fifteenth international biennial exhibition of fine arts. The committee has made new arrangements regarding exhibitors and their pictures. Owing to limited space, and to avoid favoritism, each artist will send one picture, and only a few exceptions will be made to this rule in the case of very important pictures. A new feature in the exhibition will be decorative architecture, which for the first time will make its appearance in this biennial show. As the work of recent masters is now sufficiently familiar, the organizing committee of the exhibition is trying to collect pictures representing the art of a more distant period, such as the works of Von Harées (Germany), Boecklin (Switzerland), Van Gogh (Holland), Rops (Belgium), Rossetti (England), and Degas or Gaugin (France). Italy's principal representatives will be Laudi, Segantini, Botti and Sabatelli. Two painters and two sculptors, Carena and Soffici, Bazzi and Baroni, will be given individual shows during the exhibition.

Although the actual development of the Mezzogiorno, as Southern Italy is generally called, is not so evident, and although great results are not to be expected for the next few years, its progress is proceeding satisfactorily. One by one all the difficulties which stood in the way of its prosperity are being removed, and the latest measure adopted by the Minister of Public Works eliminates one of the greatest causes of economic depression in those provinces. The population in Southern Italy is not so dense as in the north and in the center, and on account of this small number of inhabitants large tracts of land have remained uncultivated. It has been the custom until now when works had to be carried out in these almost deserted districts to erect temporarily sheds for workmen, but these were usually so uncomfortable and offered such indifferent protection, that only the most inskilled chose such employment. The Minister of Public Works, with a view to gradually developing the whole of southern Italy has asked for funds for the creation of settlements in these uninhabited zones where comfortable villages will be built for peasants and their families. The permanent dwellings built on modern lines will attract many workers to the south, and important reclamation work may thus be started.

4 4 4 Italian emigrants will soor have national clubs in their countries of adoption which will serve to keep alive the love for the mother country and create a new link among the many thousands of Italian workers who

have settled abroad. The Italian ambassadors, consuls and emigration officers abroad have receive instructions from their Minister of Foreign Affairs, Benito Mussolini, to start these institutions in their respective These clubs, which will be similar to those already in existence in many parts of Italy, will be generally adapted according to local customs and surroundings, but will have a uniform plan for the physical, moral and educational instruction of the Italian worker. Propaganda against alcoholism is one of the principal features of the program of these clubs, while the spread of Italian culture takes also a prominent place. In this way Signor Mussolini hopes to raise the general standard of efficiency of the Italian emigrants.

4 4 4 Important restoration works have been started on the Roman Theater of Ferento, the Etruscan city five miles north of Viterbo, which contains extensive mediæval Roman and Etruscan remains. This theater which was built by the emperor Otho, a native of Ferento, is considered to be one of the best preserved classical theaters in Europe, and owing to the perfect state of the ruins can still be used for the production of classical plays. Capt. Alexander Hardcastle, who has already restored the Greek temple at Girgenti, in Sicily, has undertaken to restore the theater completely, and he hopes to finish his task before next summer. The theater has seats for two thousand people, and a society has already been formed for giving Latin plays during the summer months. + + + .

The King of Italy, as grand master of the order of St. Maurice and St. Lazarus, has presented to the knights of this order the royal villa of Stupinigi, situated about six miles from Turin, which thus becomes their headquarters. The villa, which since 1900 has been occu-pled as an autumn residence by the Queen Mother, Margherita of Savoy, contains several rooms with fine frescoes and is surrounded by an extensive deer The knights will hold their yearly meetings and recep-tions in this beautiful villa and will be responsible for its upkeep and for its historic centents. The knighthood of St. Maurice and St. Lazarus is a dignity conferred on persons distinguished in the public services, natural science, art and letters, trade and above all in charitable

"Sabbath Day Houses" in New England

To the Editor of THE CHRISTIAN SCIENCE MONITOR: An article in a recent issue of the Monitor is very ineresting. It is about the Sabbath Day houses in Texas. I wondered how many of its readers knew that it was an early custom in New England to have such.

In Middletown, Conn., they were used by my ancestors, among others, as early as 1660. They were called "Sabba Day Houses." It was thought sinful at that time to build a fire in the Lord's House. They were primarily built for the people coming to church, to be used for them to get warm at the large fireplaces therein.

There were also accommodations for simple cooking. Sometimes when they were built with two stories, the lower floor was used for the horses.

Another article of deep interest told of tablets being placed in locations in America that were named for per-

sons or places in England. This strikes me as such an essentially right thing to do, as it is one more step in strengthening the bond be-tween the English-speaking races, helpful to the whole world, and expressing the message of the present season-"Peace, good will to men." Chicago, Ill.
